Plastic surgery is a surgical specialty involving the restoration, reconstruction, or alteration of the human body. It can be divided into two main categories - reconstructive surgery and cosmetic surgery. A plastic surgeon's primary responsibility is performing surgical and non-surgical procedures, and they use a variety of reparative and reconstructive techniques to get the job done.

Attributing his success to God, Dr. Trevisani believes that his innate intelligence and his whole traditional Italian-American background has contributed to the development of his character and conscience. Moving forward, he hopes to continue to do what he is doing and to inspire others to pursue

their dreams and be the best that they can be.
