Get to know Dentist Dr. David Babb, who serves patients in Beaufort, South Carolina.

New York City, Oct 1, 2020 ([IssueWire.com](https://www.IssueWire.com)) - Recognized as a skilled dentist, Dr. Babb specializes in cosmetic, implant, and family dentistry. He is proud to provide high-quality dental care to patients in Beaufort, South Carolina, and communities in the greater Port Royal Island area at Beaufort River Dental.

He and his team of compassionate dental professionals provide the community with a comprehensive range of options that include cosmetic and restorative dentistry such as porcelain veneers, dentures, dental implants, and full mouth reconstruction. They use the latest state-of-the-art technology and advanced procedures to restore and enhance natural beauty. Their goal is to provide results that give patients healthy, dazzling smiles for years to come.

When it comes to providing dental care options, Dr. Babb believes in the concept of preventive care and education, so his practice places an emphasis on thorough oral examinations. He feels that information is key to maximize both dental and overall health, which is why he makes it a point to educate each patient about all available treatment options so that they can make an informed decision on how to maximize their oral health.

A South Carolina native who grew up in Bishopville, Dr. Babb attended Wofford College for undergraduate studies in Biology and Business and then completed his Doctor of Medicine in Dentistry degree at The Medical University of South Carolina.

For his Advanced Education in General Dentistry Residency, he attended the University of Florida. He is also a graduate of the Pankey Institute and Dawson Academy, which are known for advanced education in dentistry for practitioners who want to provide the most comprehensive and advanced dental care.

A Fellow of the International Congress of Oral Implantologists (FICOI), Dr. Babb is a member of the American Dental Association and the Academy of General Dentistry.

Dentistry, also known as Dental and Oral Medicine, is a branch of medicine that consists of the study, diagnosis, prevention, and treatment of diseases, disorders, and conditions of the oral cavity. Dentists diagnose and treat dental issues and help patients develop better oral hygiene regimens. They clean teeth, correct bite issues, perform surgeries and extractions, and perform other duties to ensure that the teeth and mouth are healthy.
