

## Oluwaseyi Olufemi Emmanuel: I Have Always Loved To Be A Computer Guru

**Bronx, Sep 9, 2020 ([IssueWire.com](https://www.issuewire.com))** - *Oluwaseyi Olufemi, popularly known as Some4real. One of the fast-rising musician in 2019/2020.*

**Dreams as a child**

As a child, I have always wanted to be a computer guru. Since little I noticed I have this interest and passion in me to become a computer programmer. Well, during my kindergarten, *lol*, I wanted to be a doctor so I'd be able to treat the sick ones but as time went on, everything changed.

If [Google](#), [Facebook](#) or [Microsoft](#) calls me, *omo I go pack my load ni o*. I watch a lot of tutorials on youtube and it grew my interest more in becoming a computer guru. Well, I love music too. I have always wanted to be a great musician too.

What I know is that whatever I find myself doing, I should do it very well.

I attended Zion International School as my primary school in Nigeria. My dad was a teacher then to what I can actually remember. And in 2011, I started my secondary education at Excel College in Nigeria too, JSS 1 to SS 3 where I studied sciences. And by 2017, I wrote my [WAEC](#) and thanks to God I made my papers.

### **Best Moment**

Uhm, I started shooting some videos in my room and I had an interest in editing videos. I am not actually a camera person but for the sake of editing, I had to shoot a video by force, *LMAO*. It wasn't easy. But at that time, my interest in computer science and music grew stronger. In early June, I had to make music and shot a video myself. I was using my Samsung S9, and I bought a tripod stand. I shot many takes. I never attended a shooting scene though but I just have an interest in it. And the video came out so well.

My number one best moment was when I was in the cloud, I'm not gonna tell you about it. I will tell you in the next interview.
