

Kangaroo Training Institute offers Work Safely at Heights, an Online Refresher Course

Kangaroo Training Institute

Willawong, Oct 21, 2020 (Issuewire.com) - Kangaroo Training Institute has been offering work safely at heights, an online refresher course at the most economical rate. Kangaroo Training Institute is a Registered Training Organisation (No.45142) accredited to provide training and assessment competencies.

The company caters for more than just training; their CAD Design and Fabrication Services are also available. It is a Registered Training Organisation accredited to provide training and assessment competencies.

Kangaroo Training Institute Pty Ltd is a WTIA (Welding Technology Institute of Australia) approved welder & boilermaker skill training and examine centre. They are also registered with the AWCR (Australian Weld Certification Register) as an approved testing centre. They train, test or qualify welder at your company WPS, Weld Australia WPS or Third Party WPS. It will be great option to test welder/boilermaker skills before sending them to the site.

Some of the courses offered by Kangaroo Training Institute are –

- Basic Welding Course
- Intermediate Welding Courses
- MEM10119 Certificate I in Engineering
- MEM20413 Certificate II in Engineering Pathways
- Work Safely at Heights
- Advanced welding courses
- Other high risk courses

Besides these, the institute also provides a wide range of services, such as –

- Welding inspection
- Custom fabrication
- CAD services

Their aim is to support and educate people. They want people (engineers, designers, and fabricators) to understand the associated complexities and handle the task with utmost care and attention. Indeed, they want to promote welding as a great profession by encouraging, educating and facilitating the exchange of information through credible courses.

The institute believes in quality, best-in-class technology innovations, scalable solutions, collaborative efforts, integrity and performance; and has become recognized and sought out for its deep knowledge, innovation, domain expertise and leadership position in regards to online courses and services.
