

Michelle Corvallis, DC, a Chiropractor with Harmony Chiropractic LLC

Get to know Chiropractor Dr. Michelle Corvallis, who serves patients in Farmington, Missouri.

New York City, Nov 10, 2020 (Issuewire.com) - Harmony Chiropractic LLC in Farmington, Missouri is locally owned and operated by Dr. Corvallis, a friendly and family-focused chiropractor. It is her mission to provide quality chiropractic care at an affordable price to every man, woman, and child that comes into her office.

Making it a point to educate her patients about their bodies, Dr. Corvallis loves it when her patients ask questions about anything health related. She considers many different types of adjusting techniques that are specifically chosen for each individual patient. She also performs soft tissue release on her patients either using her hands or a soft tissue tool, so that their muscles are more relaxed, thereby allowing adjustments to be more effective. Throughout her treatment plan, she will give each patient exercises that are tailored to their needs so that they can start strengthening and retraining the muscles they need to start moving more efficiently and pain-free.

In 2017, Dr. Corvallis graduated with her Doctor of Chiropractic degree from the Logan University College of Chiropractic. She also graduated from Southern Illinois University Edwardsville with a Major in Biological Sciences with a Minor in Biochemistry.

During her experience with Family Care Clinic through the Saint Louis University School of Medicine as a clinician's mentor, she realized that chiropractic care should be available for everyone. She worked with low income patients and saw the true need and amazing results from quality chiropractic care.

Certified through the American Board of Chiropractic Acupuncture, Dr. Corvallis is a member of the American Chiropractic Association. With a passion for helping people and animals together through chiropractic, she is an animal chiropractor certified through the International Veterinary Chiropractic Association.

Chiropractic is a form of alternative medicine that mainly deals with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. A chiropractor uses spinal adjustments, manipulation, and other techniques to manage patients' health concerns, including neck pain, back pain, headaches, vertigo and a long list of other ailments and conditions. They aim to improve patients' functionality and quality of life by properly aligning the body's musculoskeletal structure and enabling the body to heal itself naturally, without the use of medication or surgery.
