

Sherry L. Neyman, MD, MS, FACOG, an Obstetrician-Gynecologist in Private Practice

Get to know Obstetrician-Gynecologist Dr. Sherry L. Neyman, who serves patients in Austin, Texas.

New York City, Nov 25, 2020 (Issuewire.com) - For over two decades, Dr. Neyman, an experienced obstetrician-gynecologist, has had the privilege of providing women's healthcare to Austin, Texas women. In 2013, she transitioned her medical practice, focusing on wellness, gynecology, menopausal issues and infertility.

Serving with compassion and respect, Dr. Neyman seeks to provide the highest level of health care to women of all ages, and at every stage of life, from teenage through senior years. She offers state-of-the-art technologies and treatments in a warm, welcoming boutique setting. Her gynecology-only practice allows her to focus more on her patients without the unpredictable schedule challenges of an

obstetrician. She greets each patient with a hug, and her genuine interest in helping her patients achieve their best life shines through in every visit.

In addition to hysterectomies, Dr. Neyman uses da Vinci technology to treat polycystic ovary syndrome, uterine fibroids, and pelvic prolapse. She also has a special interest in menopausal medicine. She works closely with her nurse practitioner, Brittaney Swift, to counsel patients regarding all options for treatment of menopausal concerns, including bioidentical hormones.

She provides the latest in treatment for painful intercourse and feminine issues, including the Mona Lisa Touch laser treatment that helps restore normal function to the vaginal tissues. She has performed over 600 MLT treatments and sees women from all over Texas for consultations. This therapy is especially important for women who cannot consider hormones for treatment of vaginal discomfort, such as breast cancer survivors.

Patients' comfort and need for effective solutions to health issues are among Dr. Neyman's primary concerns. In addition to state-of-the-art surgeries, she offers a complete range of comprehensive gynecological services at her Austin office, including wellness exams, cancer screenings, blood tests, and in-house lab reports.

Serving as a founding member of the Texas Institute of Robotic Surgery, Dr. Neyman has performed over 500 robotic hysterectomies personally and assisted in training physicians on many more. Her warm and outgoing practice style is perfect for addressing issues, including hormone replacement therapy, stress incontinence, and menstrual issues.

A leader in the Austin medical community, she serves as Chairman of the Board of Trustees with the North Austin Medical Center. She is also the Gynecology Chief for North Austin Surgery Center, a physician at Renaissance Women's Group, a Fellow of the American College of Obstetricians and Gynecologists (ACOG), and a member of the American Association of Gynecologic Laparoscopists.

Possessing a solid educational background, Dr. Neyman graduated with her medical degree from UT Southwestern Medical School where she was voted outstanding OBGYN student in 1992. She then went on to perform her residency in obstetrics and gynecology at Parkland Memorial Hospital in Dallas. She has completed advanced training in minimally invasive surgical techniques, allowing her to successfully resolve complex issues such as endometriosis, PCOS, and fibroids with the very latest options, including laparoscopic and laser treatments.

Recognized in Austin Monthly's "Best Doctors in Austin", the doctor is board-certified in obstetrics and gynecology by the American Board of Obstetrics and Gynecology (ABOG). The mission of the ABOG is to define standards, certify obstetricians and gynecologists, and facilitate continuous learning to advance knowledge, practice, and professionalism in women's health.

Obstetrics and Gynecology is the medical specialty that encompasses the two subspecialties of obstetrics and gynecology. An obstetrician-gynecologist, or OB-GYN, is a healthcare professional who specializes in female reproductive health.

When not caring for women, Dr. Neyman shares her passion for animals with the Austin community, rescuing rabbits as part of the House Rabbit Resource Network. She currently has 6 adorable, spoiled bunnies (BonBon, Kona, Kali, Marti, JR and Meghan - who were all abandoned Easter pets) and an engineer husband, Jim, who helps wrangle them when it is time to go to bed.

On a more personal note, she enjoys traveling, scuba diving, native Texas gardening, and catching up on TV. She is an avid reader and spends way too much time surfing the internet.
