The high intensity and sheer tenacity of "*this record are from beyond a place we call now.*"

The claims of Tupac's alleged livelihood are always met by the fanatics...

Rap Master 1 says "***The 7-day theory is real and there is evidence 2pac is alive.***"

"Rap Master 1" now presents actual testimony from "**The Don**" himself extracted from secret messages encrypted into his music.

On a further note, a classified audio recording of "**Suge Knight**" and **2pac's** former security personnel, on the night of the shooting, confirms the man identified as **Tupac** was indeed not *Tupac* but his "body-double" w/ name. The autopsy report re-confirms these facts.

"**Tupac Amaru Shakur**" is 5' 9, 167 lbs... the man pronounced dead after "days in hospital" was reported (by coroner) 6 Feet tall and 215 lbs. (**View Statistics on featured document**) The audio recording clarified that **2Pac** had not been in the famed fight between his entourage and his rivals at the **MGM** because Tupac didn't "want to be there" and "had a bad feeling". It **was** his double. (confirmed by the security agency that protected him and also by "Suge Knight" on hand-held radio recordings as the result of the MGM's 24-hour surveillance and monitoring.)

Also, the news reported an air-lift ambulance from the scene of the shooting when the record of the actual account states he was rushed to hospital by ambulance on the ground.

So, in other words, there are 2 accounts of the incident that fateful night in Vegas, Sept 7, 1996.
