TEST WELL LAUNCHES AT-HOME HOLIDAY COVID-19 TESTING

Bringing families together with Same-Day results

South Lake Tahoe, CA: Test Well today announced the launch of At-Home Holiday COVID-19 Testing. With a purpose-built lab right here in Tahoe and a unique method of pooling samples, Test Well has lowered the cost and increased the accuracy of COVID-19 testing - all while delivering results the Same Day.

Just in time for the Holidays, Tahoe families and visitors will have access to quick and affordable testing featuring:

- Non-invasive saliva sample
- At-Home collection by Test Well personnel
- SAME-DAY results when collected by 3 PM

“We know people are going to gather for the Holidays” said co-founder Charles Boldwyn. “We want to give folks another tool that can make these interactions just a bit safer.”

The quick return of results collected from simple saliva samples combined with industry-leading real-time quantitative PCR technology gives Test Well a unique advantage over other forms of testing. By simplifying the collection process and an ability to detect the presence of the SARS-CoV-2 virus with far lower thresholds than any “rapid” test currently available, Test Well can identify asymptomatic and pre-symptomatic individuals who are thought to be the most significant contributors to the community spread of COVID-19.

Health experts and the CDC agree that a multi-layered approach that includes testing, regularly checking symptoms, wearing masks, distancing, and personal hygiene are the greatest inhibitors to spreading COVID-19.

###

About Test Well

Headquartered in South Lake Tahoe, CA, Test Well was launched with the mission to make COVID-19 testing fast, reliable, and accessible. By utilizing the latest in medical technology and combining it with an obsessive focus on experience, Test Well is disrupting the traditional model of clinical laboratories.
