

Get to know the Reproductive Endocrinologist and Infertility Specialists of Generation Next Fertility

New York, New York City, Feb 26, 2021 ([IssueWire.com](https://www.issuewire.com)) - Generation Next Fertility is a state-of-the-art boutique medical fertility practice for women, focused on compassionate, unique, and highly individualized care. Starting with the first patient interaction, an exemplary team delivers superb service highlighted by extraordinary access to the practice's sensitive, caring, and well-trained physicians. Medical care is complemented by integrative fertility treatments such as natural cycle and mild stimulation IVF protocols, and acupuncture.

Experienced doctors continuously break barriers in the way fertility care is delivered by utilizing best-in-class medical and information technology, communication modalities, recruitment, and training. Above all, they connect with patients in a manner that is novel, holistic, and demonstrative of their commitment to their patient's entire journey and success.

Dr. Janelle Luk:

Dr. Luk, one of the top board-certified reproductive endocrinologists and infertility specialists in New York City, is breaking barriers in the world of IVF as the Medical Director at Generation Next Fertility. She specializes in creating individualized fertility treatments based on each patient's needs.

"The reason that I founded this center is not only because I love what I do, but also that I wanted a place that can empower women of their bodies and make them aware of their choices and the different styles of stimulation depending on who you are. My patients and I are a team, and together, we will create an individualized protocol that will strive to provide the best outcome and maximize your chances of getting pregnant" expressed the doctor.

With specialization in creating individualized fertility treatments based on each patient's needs, her areas of expertise include a diminished ovarian reserve, infertility of unknown etiology, polycystic

ovarian syndrome, and recurrent pregnancy loss. She brings her experience at two prestigious NYC fertility practices, including a previous role as Medical Director. This puts her in a unique position to cater to women of all ages and offer them the best available treatments.

After earning her Bachelor of Science degree in Biology in 2001, Dr. Luk went on to obtain her medical degree from the Yale School of Medicine in New Haven, Connecticut in 2005. Thereafter, she completed her residency in obstetrics and gynecology at Massachusetts General Hospital and Brigham Women's Hospital, followed by her fellowship in reproductive medicine and infertility at Yale University School of Medicine.

Active in research within the reproductive endocrinology field, she has published numerous reviews and research articles over her years of practice. She has also presented her research both nationally and internationally in China and Hong Kong.

In addition to being a Fellow of the American College of Obstetricians and Gynecologists and a member of the American Society for Reproductive Medicine, she is dual board-certified in reproductive endocrinology and infertility & obstetrics and gynecology through the American Board of Obstetrics & Gynecology (ABOG). The ABOG is a non-profit organization that provides board certification for practicing obstetricians and gynecologists in the United States and Canada.

Among Dr. Luk's various awards and honors include Harvard Medical School Resident Teaching Award (2009); APGO/CREGO Resident Scholar Award (2007); Regional District I Richardson Manuscript Award (2007); American Women Medical Association Outstanding Women in Medicine (2005); Cum Laude Honors for Yale University School of Medicine (2005); Ferris Award for Outstanding Research Thesis (2005); Farr Scholar in Recognition of Excellence in Research (2004); the Society for Gynecologic Investigation Student Research Award (2003); Human Biology Research Honors Thesis Award (2001); and Commendation by Senate and General Assembly of NJ (1997).

On a more personal note, she speaks multiple languages, including English, Cantonese, and Mandarin.

Dr. Edward J. Nejat:

Dr. Nejat is an accomplished fertility specialist and reproductive endocrinologist who considers the doctor-patient relationship to be paramount. As the Practice Director of New Generation Fertility, he believes that spending adequate time with his patients, being accessible to answer their questions, and having empathy, in addition to possessing exceptional clinical ability, are crucial to providing best-in-class medical care.

"I strive to create a calm setting in which all of us at Generation Next can provide the consummate patient experience. Helping families achieve their reproductive dreams is what drew me into this field. It is the most fulfilling aspect of my career" expressed the doctor.

His particular areas of scientific interest include natural cycle IVF, mild stimulation IVF, unexplained infertility, diminished ovarian reserve, oocyte cryopreservation, and oocyte donor/recipient cycles.

Spending the vast majority of his academic and professional career in New York City, Dr. Nejat received his Bachelor of Arts degree in Biology from New York University's College of Arts and Science, his medical degree from Weill Cornell Medical College, and his Master of Business Administration degree from The Johnson School of Management of Cornell University. He then completed his residency in obstetrics and gynecology at New York-Presbyterian Hospital / Weill Cornell and his fellowship in

reproductive endocrinology and infertility at the Albert Einstein College of Medicine / Montefiore Medical Center. He was part of two Manhattan private practices prior to co-founding Generation Next with Dr. Luk.

A Fellow of the American College of Obstetricians and Gynecologists (ACOG), he is dual board-certified in reproductive endocrinology and infertility & obstetrics and gynecology through the American Board of Obstetrics & Gynecology (ABOG). The ABOG is a non-profit organization that provides board certification for practicing obstetricians and gynecologists in the United States and Canada.

As a testament to his success, Dr. Nejat has received numerous awards and has been published widely in the field of reproductive endocrinology and infertility with contributions to scientific journals including The New England Journal of Medicine Human Reproduction, Fertility and Sterility, and The Journal of Clinical Oncology. He has presented his work at national and international academic conferences, and various media outlets have reported on his research including the BBC, The Telegraph, Medscape, Pregnancy.org, and IVF.net.

Outside of work, he enjoys travel, photography, and is proficient in Spanish. He lives in Manhattan with his wife, also a physician, and their children.

Dr. Jesse Hade:

Dr. Hade is a compassionate and dedicated board-certified reproductive endocrinologist and infertility specialist with over 20 years of private practice experience. He is the Third-Party Reproduction Director of Generation Next Fertility, working alongside Dr. Luk and Dr. Nejat.

Treating complex and often overlooked problems is a specialty that Dr. Hade has mastered throughout his career. Experience matters, since all treatments provided by him, are handcrafted and tailored to the specific needs of his patients. He believes great treatment does not have to come at the cost of being treated like another number and that everyone should be treated like “family.”

With a solid educational background, Dr. Hade received his Bachelor of Arts degree in Biology at Washington University in St. Louis and his medical degree from New York Medical College. This was followed by a residency in obstetrics and gynecology at SUNY Downstate Health and Science University in Brooklyn and a fellowship in reproductive endocrinology and infertility at UCLA Medical Center in Los Angeles, California.

A Fellow of the American College of Obstetricians and Gynecologists (ACOG), he is dual board-certified in reproductive endocrinology and infertility & obstetrics and gynecology through the American Board of Obstetrics & Gynecology (ABOG). The ABOG is a non-profit organization that provides board certification for practicing obstetricians and gynecologists in the United States and Canada.

An award-winning physician with numerous research studies and publications, including chapter reviews in some of the most coveted textbooks, Dr. Hade has been featured in numerous television shows and interviews and is considered one of the leading experts in infertility today. He has also mentored and trained many physicians currently in practice throughout the country.

When he is not caring for his patients, he enjoys bike riding, cooking, and spending quality time with his wife and children.

Reproductive endocrinology and infertility (REI) is a surgical subspecialty of obstetrics and gynecology

that trains physicians in reproductive medicine addressing hormonal functioning as it pertains to reproduction, as well as the issue of infertility. While most REI specialists primarily focus on the treatment of infertility, reproductive endocrinologists are trained to also evaluate and treat hormonal dysfunctions in females and males outside after the reproductive years.
