Nurse Aide Training Grand Rapids, Michigan

Michigan, Grand Rapids, Feb 23, 2021 ([Issuewire.com](http://www.Issuewire.com)) - Professional Education Services, a postsecondary school located in Grand Rapids is now fully approved, licensed, and fully operational for offering nurse assistant training here in West Michigan!

PES has been the dream of our owner and Program Director, Dr. Kenyon, for more than a decade. And as Walt Disney so famously said, “if you can dream it, you can do it,” and Dr. Kenyon has done just that. Our instructors at PES are all highly qualified nurses with at least a master’s degree and specialized training in nursing education. Our students can rest assured that they are getting the best possible training experience in our program.

Our training program offers a state of lab that fully resembles a patient room with full operational manikins, care delivery items, and every type of training supply imaginable that a student would need.

PES is now accepting new students. We offer a two-week 75 hour day program and a three-week 77 hour night program for our students. Flexible scheduling is a must-have in today’s busy world and PES recognizes this.

Payment plans, sponsorships, and scholarships are all available to our students; we are able to meet the needs of many who may not be able to otherwise afford the training.
