

Is Medical Marijuana regulated as most other medicines are?

Medical Marijuana is regulated as most other medicines are but medical marijuana has been recorded with no side effect harming the human body while adding benefits.

Florida, Florida City, Mar 22, 2021 (IssueWire.com) - According to **Medical Marijuana Doctor From Viridian Medicine**, Medical cannabis, or medical marijuana is considered to be a therapy that has attained national attention in recent years. However, there always have been legal, ethical, and social effects related to Medical marijuana use and safe administration, packaging, and dispensing also;

Medical Marijuana has currently earned much fame in the medical field with a huge treatment list for several diseases including mental, neurological and physical disorders.

How Medical Marijuana used for the First time:

It has been used for the time in the USA at Vassar College, a private liberal arts college in Poughkeepsie, New York by a junior student named Dan Shapiro in 1987. He was going under treatment of Hodgkin's lymphoma with potent chemotherapy that caused severe nausea and vomiting that was getting relieved remarkably. When his mother got aware of this and noticed some improvement in Dan's health issues, she decided to grow cannabis plants in her garden.

After decades marijuana attained medical sensation being liable for treating most of the diseases.

Journey to legalization:

Now [Medical Marijuana in USA](#) is used to treat health issues has become legal in the USA including many states and districts of Columbia. USA government has found it a good option for mental, neurological and physical disorders to be successfully treated. Being a remedy for different health issues covering critical diseases it has earned name and fame in a very short time in the medical field.

Medical Impact on Mental Disorders than other Medicines:

Having gone through many of the studies [Medical Marijuana Doctors](#) has declared that marijuana has come forth with remarkable notes than other medicines are. It has no doubt gained the position of most suitable and also advised on a major level to be taken to get over the mental disorder as well as illness. When other medicines have been noted with critical side effects marijuana has been experienced with most common outcomes of effects having no critical consequences after use or long term treatment process.

Why Medical Marijuana has become famous as a good option to treat neurological diseases comparatively other medicines:

Neurological diseases are not commonly treated. It's been considered to be a matter of serious concern for any human being as well as the doctor. Also, the doctors suggest the best options and medicines to the patients so that they might conquer their journey of hurdles filled with neurological disorder making life unhealed and uneasy. Doctors believe marijuana has become a remedy for neurological diseases after the successful treatment process of numerous patients in this way. While other medicines been effectively worse after the consumption process. Neurological diseases while being treated with medicines other than marijuana have been noted with affecting other body parts of the body with side effects having different visibility with the partial or full affected body

Physical health issues being cured with Medical Marijuana more effectively than other Medicines are:

The range of physical health issues is huge but at the same time, it's also should be recalled that physical diseases including mild to severe are being treated with weed not recently but for years. Other than strain, the medicines showing their side effects mild and deadly also that depends on the conditions of the patient of how critical the situation is. Sometimes the side effects cannot be controlled, this why doctors advise marijuana for several diseases discussed multiple times by the doctors as [Medical Marijuana](#) in the USA.
