

Riken Keiki Japan Gas Detectors Manufacturers has Extended their Services to Middle East

Riken Keiki Middle East - Get a Safe Working Environment for your Industry with us.

United Arab Emirates, Dubai, Mar 15, 2021 ([Issuewire.com](https://www.issuewire.com)) - Riken Keiki is the world leader when it comes to providing effective gas detection services and sensor technologies. The firm was established in 1939 as a part of a conglomerate and had been serving with dedication for eight decades in developing unique technology for the industry.

It has been successfully serving in various parts of the world and now extended its services in the Middle East and North Africa. Riken Keiki Middle East (ME) is now an authorized agency of Riken Keiki covering the whole UAE and all Middle East countries and has begun its precious journey in 2018.

What we Offer:-

We offer over a hundred different models of gas detectors and environmental measurement products in UAE and all over the Middle East & North Africa. Our Service support extended Oil and Gas, Marine, Steel Industries, Construction, Chemical Industries, Laboratories, Water and Wastewater treatment plants, Fuel Storage and Tank farms, FMCG / Food Industries, Firefighting, Pest Control & Fumigation, Aerospace, etc.

We have a broad range of gas detectors like personal, [portable gas detectors](#), fixed, wireless, flame detectors, Calibration stations, and controllers & indicators. We also offer a complete calibration solution for Gas detectors.

What is so special about Riken Keiki?

We have specifically designed to monitor Carbone Dioxide (CO₂), Hydrogen Sulfide (H₂S), various combustible gases and toxic gases like Ammonia, Propane, Hexanes, Hydrogen Cyanide, Methanol, and more, as well as detectors that monitor and sense oxygen deficiencies in the air.

Our professional team is especially skilled in designing and improving the quality and technical capabilities as per the requirement. We design and manufacture different industrial requirements and applications in such a way that it exactly fits the need of your business.

In-house manufacturing eliminates long lead times and ensures quality-controlled products that meet the needs of our clients worldwide. We continue to refine the technologies established through our history while investigating and improving the quality and technical capabilities of the products we provide.

Customers rely on us to detect and prevent disasters at the moment. Our service Engineers are available for the installation of any [gas detection system](#). They are satisfied with the safe working environment and a great variety of products & services.
