The process of selecting the right career path is exciting, challenging, and confusing at the same time. If you are interested in making a career in the field of beauty & wellness, then Cosmetology can be a good choice for you to get a strong base.

The basic prerequisite to become a cosmetologist is to pursue a professional cosmetology course from a reputed beauty training academy. From basic to advance, a course in cosmetology includes everything that should be at the fingertips of a cosmetologist. By enrolling for the course, a student gets to study topics like keratin treatment, facial and advanced skin treatments, hair coloring techniques, pedicures, and manicures, etc. On average, the cosmetology school course curriculum all over the world includes the following fundamentals:

- **General Cosmetology-** It introduces you to the psychological aspect of your clients through basic patient ethics and personal grooming. You can understand your clients' skin and hair types, requirements, and deliver services accordingly.
- **Hair Care-** You will learn various methods of shampooing, conditioning, and essential hair care treatments like spa, keratin, and smoothing. You can even get to learn the specialties of hairstyling like trimming, thinning, curling, cutting, and shaping techniques.
- **Haircutting and coloring:** An advanced course in cosmetology introduces you to hair coloring techniques. However, hair cutting generally is a part of a basic cosmetology course. You can learn detailed types of hair coloring like touch-ups, global, highlights, ombre, etc. Various types of hairstyling like braids, buns, updos, crimps, and curls are also taught in the course. You also get to study details on wigs, artificial hair, and hair accessories.
- **Nail care-** Nail care is one of the most important topics covered in the cosmetology course curriculum. It includes the study of manicures and pedicures. Only a professional cosmetologist with sound knowledge can do manicures and pedicures with utmost care and perfection.
- **Skincare-** You will get to learn various skin types and how to offer skin treatments based on the same. Rewarding your client with radiant and beautiful skin is the biggest challenge and only a cosmetology course can help you ace it.
- **Makeup application-** The art of applying makeup is an essential technique so that the face does not look caked up. cosmetology course curriculum teaches you makeup types and applications. So join the course and get trained on makeup tools, types, applications, tips, and aesthetics.
- **Facial treatments-** Learn the technique of cleansing, massaging, facial hair removal, and mask application, applying pressure on the right points, and delivering a complete facial service.
- **Salon management-** Cosmetology schools provide training on building strong client relations,

effective marketing techniques, and brand reputation.
