Back Thru The Future has just launched its new website, **IoMTsolutions.com**. The new website focuses on the destruction and recycling of Internet of Medical Things devices and other electronic medical equipment recycling and disposal.

The Internet of Medical Things (IoMT) encompasses a large number of devices used in the medical industry. From personal devices, telemedicine, monitoring devices, to computers, printers, testing equipment, and life-saving devices, the IoMT is becoming larger, while the devices are getting smaller and smarter. **IoMTsolutions.com**, powered by Back Thru The Future, helps medical device manufacturers, distributors, and healthcare facilities dispose of these devices with environmentally compliant solutions that include shredding, recycling, and returns management.

“There are hundreds of regulations governing electronic disposal. We provide a unique blend of electronic recycling credentials and electronic shredding experience and capabilities unmatched by any

other company in the secure data destruction industry. Our customers can trust our proven process”, says Melanie J. Haga, CEO.

Back Thru The Future is a certified Woman-Owned Business. They have been providing regulatory-compliant electronic recycling and data media destruction for over 30 years. Visit www.BackThruTheFuture.com or www.ioMTolutions.com for more information.
