

Durham Capital Investments' Global Assets Under Management Continues Upward Curve

Durham Capital Investments are pleased to announce that the company has recently achieved another milestone by surpassing \$4 billion in Assets Under Management.

Hong Kong S.A.R., Hong Kong, Apr 12, 2021 ([IssueWire.com](https://www.issuewire.com)) - Durham Capital Investments is pleased to announce that the company has recently achieved another milestone by surpassing \$4 billion in Assets Under Management, which is a testament to the progress that the company has made in a relatively short space of time.

Durham Capital Investments CEO Douglas Thompson said, "I am extremely proud of our team in managing to turn the economic uncertainty and market volatility of the last year to a positive outcome for our clients and their investment portfolios."

2020 was a tumultuous year that saw the Covid-19 pandemic bring about initial market volatility and general global liquidity almost as critical as the financial crisis of 2007/08, resulting in reduced economic growth in many sectors. While the equity markets were able to recover, interest rates slumped and many investors struggled to find new investment solutions.

Durham Capital Investments witnessed a direct correlation between the investment challenges of the last year and an increase in clients seeking more diversified investment opportunities, which compelled the company to re-assess the normal investment strategies in order to find the appropriate solutions through global and multi-asset diversification.

Durham Capital Investments Director of Institutional Investments Jeff Hadley said, "Investors were forced to adapt to the challenging market conditions and investment portfolios now require more diversification across a broader sector spectrum, while there have been more opportunities for Venture

Capital investments.”

The result has seen the broadening of clients’ investment portfolios in terms of industry sectors, as well as in private debt and Venture Capital opportunities in real estate and established private businesses, as well as an increase in institutional entities like insurance companies adopting more investment solutions in the operation of their wealth management.

Durham Capital Investments CEO Douglas Thompson said, “The marketplace is not a fixed landscape and investors need to be willing to adapt from time to time as the market conditions dictate. This milestone in Assets Under Management, and the success of our investment funds, is testament to the faith placed in our investment team.”
