

## AI Imran Niloy: Humtalk Softwares Unveils A New Social Networking Site Free From Data Harvesting And Mining

Humtalk softwares unveils a new social networking site free from data harvesting and mining, breakthroughs in technology and concepts to redefine social media and user interactions.

**Bangladesh, Dhaka, May 13, 2021 ([IssueWire.com](http://IssueWire.com))** - At an exclusive launch event held online, **Humtalk** Software LLC unveiled a gigantic social media site that is based on the concept of safeguarding users' data and privacy, unlike its other competitors. The Humtalk social media site features a professional elegant design interface and all major features offered by other competitors like Facebook, it also gives users premium options to upgrade and unlock more verified features.

Humtalk set new expectations for social media users with the launch of the Humtalk site, one of the first social media sites prioritizing users' privacy to give a safe online atmosphere for everyone.

“We believe people should have the freedom to socialize and share moments online without their personal data are being harvested”
