Maharashtra, Mumbai, May 25, 2021 ([IssueWire.com](https://www.issuewire.com)) - According to the recent report published by Decision foresight, The Global [Alopecia Market](#) is accounted for 2.8 billion USD in 2020 and is predicted to reach 7 billion USD by 2030 with a CAGR of 9.4% during the forecast timeframe.

Alopecia refers to hair loss from parts of the head or body regardless of any age group across the genders. Various factors like sedentary lifestyles, unhealthy eating habits, growing stress levels, hormonal imbalance, hypertension, and depression attribute to alopecia but the actual causative reason is still unknown. Furthermore, aging and chronic disorders also lead to alopecia. The above-mentioned factors are the key drivers responsible for the growth of the alopecia treatment market. The number of people seeking alopecia treatment is very high in developing countries and is growing in emerging economies.

The report titled "Alopecia Market - Global Trends, Market Share, Industry Size, Growth, Opportunities, and Forecast - 2020 – 2030" offers a holistic view of the `Alopecia industry encompassing numerous stakeholders including raw material suppliers, providers, distributors, consumers, and government agencies, among others.
