# Ayush Patel's An Ethical Hacker Providing Cyber Security to Companies

Ayush rightly proves that his fulfillment is beyond all of the educational qualifications and ranges.

Uttar Pradesh, Lucknow, May 8, 2021 (Issuewire.com**)** - It has emerged as a norm that to be a hit

person, one ought to have the educational tiers and must be exceedingly qualified. While schooling plays a crucial function in constructing a career, what matters the most is the enjoyment one possesses in a particular subject. The world's most successful marketers like Bill Gates, Michael Dell, Mark Zuckerberg, and plenty of others are university dropouts however nowadays they may be a suggestion for the youngsters. Ayush Patel, an ethical hacker is following the ideologies of those gents and has made his call as a successful individual in the cybersecurity world. At an age, while humans were busy partying, this younger man spent his time doing something out of the container. Currently, Ayush Patel is the world's youngest autodidact ethical hacker.

With years of revel in and information in hacking, he based his enterprise named Ayush Security Solutions in 2019. It is a cybersecurity firm, based totally out of Lucknow. At a totally soft age, Ayush identified the capability of cybersecurity and then he invested his time in studying moral hacking. In these days' time whilst the whole thing has emerged as digitalized, the security of the companies is in better danger. However, Ayush Patel and his corporation continually stood like a pillar for the agencies who need to defend their economic records from cyber threats. Understanding the rise of digital crimes, Ayush Patel learned the fundamentals of hacking and is now ruling the roster with Ayush Security Solutions

The manner of turning into a top-class ethical hacker becomes not clean. Spending maximum of his time in laptop surfing, Ayush first understood how a pc device functions with the internet. At the age of 18, he attended his first seminar on ethical hacking in Navodaya Vidyalaya Sitapur after which he did an authorized path alongside mastering other programming languages. Well, it becomes only after his path he determined to establish an employer of his very own this guy has absolutely created a revolution together with his super capabilities.

He said, "Don't observe the cash, comply with your ardour and capabilities work tough to make a logo and see money will mechanically follow you"

My easy rule in life is to Learn then Earn. That's how I work and progress in my subject." Amidst the COVID-19 pandemic, Ayush's enterprise gave cybersecurity safety to many online companies whose databases had been at high risks. With a huge boom in moral hacking, the young and gifted entrepreneur is taking his work throughout borders and his employer is truly the rising call within the global markets.
