

THE NEW 1000x? DOGE DIAMOND - THE SCARCITY OF BITCOIN, THE FUN OF DOGECOIN

A New Community-Driven MemeCoin That Separates Itself From The (doge)Pack

New York, New York City, May 17, 2021 ([Issuewire.com](https://www.issuewire.com)) - The brand-new cryptocurrency Doge Diamond is launching its website with whitepaper and roadmap together with a massive marketing push today at 20:00UTC.

After Dogecoin reached new highs amidst a hype-driven by media personalities by the likes of Elon Musk and Snoop Dogg, new "meme coins" are emerging daily. However Doge Diamond is different,

combining a scarce supply of only 1,000,000 DD tokens (compared to 130 billion Dogecoins), and all fully released to the world fairly. Today, Doge Diamond launches their marketing campaign and a brand new website, with its coin already trading on PancakeSwap. With its supply fixed at 1 million DD coins creating exclusivity, and its 100% community-driven concept with renounced ownership, also the locked liquidity, Doge Diamond has done something remarkable. They have created a 100% 'rug-proof' token, and therefore a safe store of value, for the next generation of crypto fans. The coin is built on the stable and versatile Binance Smart Chain and can be bought on Pancakeswap.

Doge Diamond launched at a price of \$0.008. At the time of writing Doge Diamond (\$DD) is trading for \$0.60, with a market cap of \$600K. The price is expected to increase rapidly with the upcoming marketing campaign across Twitter, Tik Tok, Twitch, Reddit, and more, combined with the low supply.
