**25th June 2021 London:** Boost the productivity and efficiency of the workforce with the most effective project management and time tracking software, KnowYourDay. Managing tasks, projects, and tracking time comes easy with just one solution, KnowYourDay. This is a user-friendly pop-up app that will manage your projects and run in the background for tracking time and tasks for counting billable hours. In the current flexible work environment of the new normal world, this is a must-have application for your business.

We got to talk to a spokesperson from KnowYourDay. While talking about their approach, he said, “In a difficult time like this, it is essential for businesses to have the [project management tool](#) that will help them monitor and track the projects and progress along with the outputs of each employee as everyone is working remotely. KnowYourDay respects privacy. And that is why this application brings AI-powered dashboard and secure insight tool that will monitor the activity without compromising with the

employee's privacy." KnowYourDay is a dependable, lightweight scalable tool for time and motion study.

## Why KnowYourDay

KnowYourDay is an application that runs in the background without interrupting the needful activities for the employees. Do away with the notion of snooping with a [time tracker for employees](#) as Know Your Day brings in the concept of tracking while respecting privacy. With this, you get,

- Easy user-friendly interface for faster implementation
- Tracking time by the seconds
- Scalability with the options of adding, editing, and deleting projects
- Secure storage in local device
- Complete update on the timesheet IN CSV format
- Three different affordable packages according to your budget
