

CMN Token ICO Sale to Start from 16th June: Aimed at Redefining Investment

CMN TOKEN ICO SALE TO START FROM 16TH JUNE

London, Harrow Weald, Jun 14, 2021 ([Issuewire.com](https://www.issuewire.com)) - Crypto Media Network, also known as CMN, is geared to launch the ICO sale of its CMN Token on 16th June.

Crypto Media Network is a full-time news services channel featuring cryptocurrency trends, widgets, and charts. The company aims to address the inefficiencies in the crypto media – such as fake and uncertain news, lack of subject matter expertise, and more. CMN offers an unbiased media platform committed to delivering accurate and legitimate data by subject matter experts.

The CMN Token is designed to revolutionize the investment paradigm. Based on blockchain technology, CMN Tokens hold significant potential to drive more transparent, quick, secure, and cost-efficient transactions. In addition, CMN Tokens can be used to participate in investment programs like yield farming and staking to earn passive income.

Crypto Media Network will mint a total of 30 million CMN Tokens and distribute them among potential CMN holders during various processes. Out of these 30 million CMN tokens, 3 million will be distributed during the ICO sale while the rest of the tokens will be utilized for other programs, including IEO, staking, farming, and more.

The token is valued at \$0.80 per CMN Token. Investing in CMN Tokens will not only enable people to unleash the potential and benefits of a digital currency but also enable them to own a currency that is free from any central authority, thus enabling people to have complete control over their transactions

and funds.

About the Company

Crypto Media Network is a crypto-driven company that is backed by a skilled team comprising seasoned finance officers, investment planners, and technical experts. The company intends to raise funds from its CMN Token ICO. These funds will be utilized to scale the company as well as develop and launch blockchain-based platforms like a crypto exchange, staking and yield farming platforms, and the company's own blockchain.
