Fedena Learn - An Integrated Solution to manage E-Learning & Administration of Schools and Colleges

Digitize the entire operations from admissions to e-learning

Karnataka, Bengaluru, Jun 10, 2021 ([Issuewire.com](http://www.issuewire.com)) - Foradian Technologies, the leading ERP software solution provider for schools and colleges have launched their new software solution - Fedena Learn. Fedena Learn offers many key features to enable the Fedena powered institutes to manage online learning and daily administrative tasks from a single integrated platform. The [online learning modules of Fedena Learn](link) enables teachers to deliver media-rich customized courses, offer a robust learning experience to students, and promote interactive learning environments beyond classroom boundaries.

The concept of traditional education has entirely changed within the last couple of years. Nowadays institutes have started embracing the e-education system to efficiently deliver online learning material to students and productively manage daily operations remotely. But selecting the right ERP platform which not only allows institutes to automate daily operations hassle-free but also simplifies online learning is not an easy task. With Fedena Learn, now you can automate the daily operations and e-learning activities from a single platform.

"Foradian Technologies has been providing ERP software solutions for schools and colleges for more than a decade. We have been constantly exploring and improving the product features to meet user needs. In this pandemic time, with education moving to online mode, we came up with the Fedena Learn Solution. Fedena Learn provides an online learning platform integrated with your favorite Fedena ERP and can add a lot of value to our customers." - Neel, CEO, Foradian

Key features available in the online learning modules of Fedena Learn:

Along with 50+ modules available in the Fedena ERP for the digital administration of the schools and colleges, the following functionalities are shipped in this new release.

- Create Engaging Courses

Instructors can create end-to-end customized & engaging courses by adding teaching materials using their favorite mediums such as videos, audio, images, text, presentations, and documents.

- Educate through Videos

Teachers can add video into the courses and other visual content to enhance the learning experience of students. Students get notified about the updates and can watch the video lectures at their own convenience.

- Mobile Learning

Using Fedena mobile app users can access online learning features, such as:

- Students can download content within the app
- Watch recorded lectures in offline mode
- Track the course progress
- Students can ask any question regarding the course and share it with instructors and classmates
- Add MCQ and descriptive quizzes in the course and assess how the student is progressing through the course.

If you want to automate institute daily operations and manage online learning from a single platform, consider Fedena Learn. Want to know more about Fedena Learn? Visit us at - Fedena Learn or connect with our experts
