

## UnitedCrowd announces listing of UCT on bitcoin.com

**Hong Kong S.A.R., Hong Kong, Jun 29, 2021 ([IssueWire.com](https://www.issuewire.com))** - Listing of the UnitedCrowd token (UCT) on Bitcoin.com will start on July 1st at 2 pm (UTC+2). After LATOKEN and Uniswap, this will be the third platform to buy and sell UCT.

UnitedCrowd is a decentralized ecosystem that connects real-world asset projects with smart contracts on the blockchain and creates FinTech solutions for start-ups while reducing risks for investors. UnitedCrowd offers the utility advantages of tokens that generate additional yield through DeFi protocols.

The B2C platform enables you to stay in control of your finances, get cash flow from tokens, and unleash the potential of DeFi. You are able to provide liquidity, buy and stake tokens, participate in governance and lotteries and receive rewards through social activities.

At the same time, UnitedCrowd is a B2B software provider that has developed a framework for the tokenization of multiple asset classes, which will then be released on the platform. Thus, the framework allows for the automatic creation of financial products in compliance with international regulations on the blockchain.

The UCT is used for the ecosystem and is a governance token, allowing all token holders to make important decisions within UnitedCrowd. In addition, UC tokens are used to incentivize behavior that is beneficial to the community. Furthermore, token holders will get the chance to support exclusive projects via the UnitedCrowd Platform.

Bitcoin.com has been standing on the frontier of the crypto ecosystem since 2013. The company CEO Roger Ver, one of the first Bitcoin investors, is, among other things, known for having invested in Ripple, Bitpay, and Kraken in the early start-up phase. He dedicated bitcoin.com to the growth of the bitcoin network and thus contributed to the flourishing of the crypto scene as we know it today. Today Bitcoin.com reaches a daily trading volume of 2,5 billion dollars, offers more than 80 trading pairs, 24/7 multilingual support, and a high level of security for trading any cryptocurrency.
