

AQuity announces the opening of a new office in Chennai that can accommodate 1,000 employees

Tamil Nadu, Chennai, Jul 8, 2021 ([Issuewire.com](https://www.issuewire.com)) - AQuity Solutions, a leading provider of outsourced [Virtual Scribing](#), [Medical Transcription](#), and [Medical Coding services](#), has launched a new operations center in Chennai that is expected to initially employ a skilled workforce of over 200 clinical documentation specialists, with future investments planned for significant growth. The expansion is driven by AQuity's leading market position in the rapidly expanding clinical documentation services market that is estimated to surpass \$16 billion in Healthcare spend next year.

"We are excited about our new location in Chennai. Our plan is to add another 800-1000 employees at the Chennai center over the next 12-15 months" said AQuity Solutions CEO, Kashyap Joshi. "With the potential, we have in the southern part of India, the Chennai location will boost our presence as a major regional player for healthcare documentation services. This new office offers us access to a highly-skilled local workforce that can help us more accurately capture the complete patient story."

"We are excited to launch our new facility in DLF Cybercity, Chennai which admeasures ~ 15,000 square feet," added Agnelo Rodrigues, Executive Director of AQuity Solutions India. This new facility at Chennai, in addition to our other operating centers in India, offers advanced technologies and local industry expertise which will serve us well as we continue to increase our capacity and expand our

market-leading Coding and Virtual Scribing operations. Even during the pandemic, we have seen unprecedented demand for all our service lines, demonstrating the value and acceptance of our offerings.”

India is the largest human resource hub for AQuity Solutions, with a skilled workforce that is proficient in the English language and supported by highly secure IT-enabled operation centers. The Company’s unique approach of adding clinical value to previously clerical disciplines is helping to expand its market share in the Coding and Virtual Scribing verticals as a more holistic approach to healthcare services.
