

bioPURE Partners with Liberty STEAM Charter School

Liberty STEAM Charter School partners with bioPURE to change the standard of clean.

South Carolina, Sumter, Jul 12, 2021 ([IssueWire.com](http://www.IssueWire.com)) - bioPURE Services announced today that Liberty STEAM Charter School recently became the first bioPURE Certified™ school in the entire Tri-County area. This certification means that Liberty STEAM

Charter School's students, staff, and faculty will experience a higher level of disinfection and overall health-safety throughout the entire school. bioPURE's advanced disinfection technology and service is proved

to eliminate virtually all germs and bacteria while being extremely safe, eco-friendly, and cost-effective.

“We chose to partner with bioPURE for our unique disinfectant needs in a K12 environment because their approach to "changing the standard of clean" rests on top quality customer service,” states Dr. Trevor Ivy, Chief of Staff. “What separates this company from the many others in the industry is their personalized approach with a unique customer service imprint. A thorough presentation was provided that was backed up with relevant data points that led us to conclude not only are their services fast, effective & affordable but gave us the confidence we are looking for to help fulfill our organization's mission.”

“We’ve taken germs serious for a long time,” says Tripp Waynick, bioPURE Sumter. He continues, “bioPURE began in 2016 with the vision to impact the health and safety of communities all across America by changing the standard of clean. Our service is designed for everyone, but for sure, anywhere our young people and children congregate on a regular basis is a top priority. Our partnership with Liberty STEAM charter school is once again proof of an organization doing the right thing to protect its students, staff, and faculty. This is just further proof of LSC’s commitment to being the educational leader in Sumter and the entire state of SC.”
