California, Los Angeles, Jul 10, 2021 ([IssueWire.com](http://www.IssueWire.com)) - Top country-pop artist Kenny Curcio has two new song releases, *My Radio* and *Heart Check*. The *Us In The USA* star returned to give his fans a new lease of life with his amazing voice that has captured their hearts for so long. The alternative country fusion singer came back once again to uplift his audience with some heartfelt music that will keep the good times rolling.

My Radio is an upbeat Rock 'n Roll-Country track that'll make you think of Tom Petty, LynyrdSkynyrd, or The Rolling Stones. The thumping kick drum paired with the driving guitars is what Kenny Curcio delivers. It's an exciting mix of good times and good 'ol Rock 'n Roll! Where's the party?

Heart Check is an uptempo Alt-Country number about reconnecting and leaving behind the 'breakup blues'. The track is high energy from beginning to end! The number evokes emotions that not only dance to Kenny's music but are also deeply ingrained and an integral part of the American culture.

Music caught the eye of Kenny from a fairly young age. A guitar received as a gift from his father did the trick which eventually led to songwriting and developing his craft in the genres of Alt-Country, Blues Rock, and Folk. He has since then steadily grown to be a celebrated musician in his community, and all across America. This country-pop artist's 2020 hit single *Us In The USA* received national recognition and was also featured on John Rich's Redneck Riviera's website. He makes every country music fan proud with the music he brings to the table. "*My Radio* and *Heart-Check* are tracks that will keep the listener in love with country music", said a spokesperson for Kenny Curcio.
