

Sandor Medicaids Brings Thermo Fisher Scientific's Accula Rapid RTPCR Test

Telangana, Hyderabad, Jul 14, 2021 (Issuewire.com) - Sandor recently introduced an innovative and state-of-the-art SARS-CoV-2 Test with a gold-standard RT-PCR detection of the Coronavirus in a point-of-care format. Thermo Fisher Scientific's Accula is an easy-to-use test with procedural knowledge of conventional rapid immunoassays.

[Accula](#) system from Thermo Fisher Scientific has received the 'Emergency Use Authorization' (EUA) from the USA's Food and Drug Administration (FDA) for SARS-CoV-2 detection in a clinical laboratory.

The palm-sized dock uses nasal swab samples and provides qualitative & reliable results in 30 minutes. The [Accula test](#) is enabled by PCR technology that permits the reduced absolute temperatures and reduced temperature differentials which results in rapid exponential amplification. No dedicated storage or transportation equipment is required as well.

Since the beginning of this pandemic, Thermo Fisher Scientific has constantly struck back to assist scientists and healthcare workers, fighting at the frontline.
