

Medical Testing Solutions Launches Its New Medical Gas Management Website

An all-new website for an all-in-one medical gas management application

Florida, Sunrise, Aug 3, 2021 ([IssueWire.com](https://www.issuewire.com)) - Medical Testing Solutions introduces its [new website](#) to accommodate the gas management needs of healthcare facilities. Committed to serving its customers in all 50 states, the company launches its website dedicated to Medical Gas America (MGA), an all-in-one gas management tool that comes with several attractive features such as asset tracking, mobile app service scheduling, and an NFPA code research tool.

Considering the current healthcare landscape, it is important for hospitals to look for safe and cost-effective medical gas sources and efficient ways for managing medical gases. MGA serves the purpose by offering free medical gas management software so healthcare facilities can focus on improving their core operations and better the lives of others.

To help its clients avail the best-quality services and make gas management a cakewalk for them, MTS has:

- Launched MGA, an all-in-one tool for all its gas management services on its new website, which is <https://www.medicalgasamerica.com/>.
- Made the software free for its customers
- Set up customer support phone and email helplines with a prompt response

MTS has always been instrumental in serving its clients with advanced medical gas services. The company offers medical gas inspection services that include checking pipes and plumbing for leaks, making sure alarm panels are functioning and easy to use, and making sure that its clients have all the proper equipment they need to do their job. In addition, it also offers medical gas verification, installations, plumbing, and maintenance services to ensure everything goes well and hassle-free.

A member of the MGA R&D team said, “We focused on developing a user-friendly, efficient medical gas management software during the design phase. We understand the needs of facility management and engineers nationwide and have launched MGA with additional features such as asset tracking, mobile app service scheduling, and an NFPA code research tool among a few other powerful tools. We understand how gas management is essential to life safety and healthcare accreditation and working towards making it easier and more accessible for all our clients. We believe that our free software for managing medical gases will assist in a philanthropic way by serving the world one healthcare facility at a time.”

Medical Testing Solutions stands for change that will better the lives of others. By now, the company has launched several medical gas products and services and is constantly working towards making gas

management easier and more accessible for all.

About MTS: Medical Testing Solutions is the industry-leading medical gas service and equipment supplier that offers medical gas services including annual medical gas testing, medical gas certifications for construction, and preventative maintenance programs. It also conducts ventilation analysis, hazardous environmental chemical monitoring, line isolation monitor testing, and dental flow meter repair among many other healthcare-based services. As a multi-service company committed to providing qualified expertise at a fair price, MTS works towards always providing the best equipment, service, and price ensuring that it is synonymous with its goal of providing reliable services to its clients.
