

## Beveron Technologies wins 'LegalTech Innovation' award by DJMC Group, Dubai

Dubai based legaltech pioneer Beveron bags the title by providing world-class legal tech solutions for the legal sector in Middle East region

**United Arab Emirates, Dubai, Sep 25, 2021 ([Issuewire.com](https://www.issuewire.com))** - Beveron Smart Lawyer Office initiative to provide world-class legal tech solutions won the 'Best LegalTech Innovation' award by DJMC Group based in Dubai Media City. David John, Managing Director of DJMC stated that the award was in recognition of Beveron's initiative of building comprehensive legal tech solutions enabling legal practitioners to adapt futuristic skills and challenges. Dubai Business Bay-based Beveron's core focus is on digitization and automation of law firms, in-house legal counsels, debt collection, and intellectual property sectors in the Middle East Region. [Brijesh](#) Chedayan, CEO of [Beveron](#) expressed his delight in winning this award in recognition of their effort to transform the traditionally conventional legal sector in the region to another level ahead. Beveron was earlier recognized with the Best Legaltech Startup firm award in UAE.

While the entire business world was moving into the wings of technology, legal industry automation in the region was being left limited to emails and word processors till recent years. New technologies are becoming more disruptive, and not just for lawyers. In order to deliver legal services with a better customer experience, law firms and legal departments must adopt new technology changes. In order to

fill this big gap, Beveron's lead a team of well-experienced legal tech professionals who brainstormed on the challenges and introduced many legal tech products designed for the modern law firms to stand on top in service in the digital age.

Smart Lawyer Office suite was designed by legal tech professionals who understand the challenges that legal professionals address in terms of all phases of legal office management. It allows law firms to completely manage their cases, no matter how complex or voluminous. Smart Lawyer Office clients can store, track, manage, classify case information and documents, and communicate in a manner that allows them the highest level of easiness, and its wide range of reports gives lawyer offices the tools to effectively manage their practices.

The key web-based legal tech platform, known as Smart Lawyer Office, is a centralized, automated, secure, electronic platform that holds important details of case laws that includes relevant documents, reports, calendars, invoices, lists of tasks, receipts, and legal accounting.

Smart Lawyer Office platform provides a modern approach to legal client care with Client Portal that enables exchanging documents, request KYC via web questionnaire, collaborate and keep updated on matter progress.

Financial management is another key area where legal offices are concerned. Integrated Legal Accounting Software with Case Management ensures legal firms' financial data is accurate and centralized. Template-driven legal processes and contracts make the day of today's life of a legal professional easier.

Smart Lawyer Office version for the In House Legal Counsels enables automation with workflows to speed up matters and reduces administrative tasks with more delegation options. Smart solutions for legal departments enable all legal matters, contracts, knowledge, contacts, and legal process to be managed in one connected system.

The case management platform is engineered to run and provide support across multiple platforms. The suit features excellent automation capabilities that auto-pilots every task and provides personalized workflow processes that can be tracked easily.

Smart Lawyer Office suite comes with different versions that suit different ranges of firms' budgets and features. The Starter version is designed for small law firms while the Professional edition is for medium size legal firms. Enterprise edition is for large legal firms with a lot of advanced features. This web-based solution can be implemented on-premise or on a private cloud account.

Beveron extends its solution in another related challenging business area, debt collection where automation simplifies debt collection processes, enabling the corporates to streamline all related follow-up, settlements, and legal proceedings. Automation in Debt Collection reduces operational costs and optimizing collection techniques to ensure that they are successful in their collection process. Debt collection platform serves the debt collections needs of corporate, banks, personal, courts, and government departments.

In addition to delivering legal software products, Beveron is also extending support in legal tech consultancy for law firms and legal departments to transform their business model with technological advancements.

"I believe that [Beveron Technologies](#) offers a complete suite of solutions within legal which ticks every

box for today's business needs and makes embracing of digital transformation easier. We are also expanding to other regions extending legal tech solution solutions for legal professionals around the globe in a cost-effective way. This legal tech innovation recognition will definitely boost our energy way forward”.

Responding to the recognition, Mr. Brijesh Chedayan, CEO of Beveron Technologies thanked their esteemed legal clients passionate about embracing technology advancements.
