

Luxury Designer Outdoor Furniture That Floats Is Making Waves In The International Design Community

Inspired By Tulum Meets Mykonos, The new line offers an OUTDOOR sophisticated new take on the world renown classic soft seating from the 1960's international design houses.

--- Around The Properties - Bahamas, Naples & Buckhead

Florida, Fort Lauderdale, Sep 10, 2021 (IssueWire.com) - David Di Meco Design, leaders in the international furniture design industry and the preeminent providers of luxury furniture & accessories indoor and out, today announced the debut of their Spazio Performance Soft Seating Collection, a new line of performance soft seating from DDMGROUP. Designed by David Di Meco, the chairs are a

sophisticated, luxurious take on the classic international soft seating designs from the 1960's, putting them in a class all their own. With grand, performance features and a commodious yet sleek design, this collection truly makes a clear statement in terms of presence and scale.

Inspired by soft & natural international coastal ease, The Spazio Performance Soft Seating collection embodies the notion of "Tulum meets Mykonos" adds David Di Meco President of David Di Meco Design. The collection combines the ease of soft seating with the high-end, modern design style and quality demanded by properties.

"These are not your typical soft seating," says David Di Meco, "There are hundreds of variations of this simple item, but the pieces that we've created for our Spazio Collection truly set themselves above the rest in terms of design refinement & durability. They are slick and distinguished with simple execution, and their volume and scale give them a grand presence as well as an inviting, all-enveloping sense of comfort. "They perfectly emulate the vibe of Tulum meets Mykonos" adds Di Meco

The new collection highlights remarkable outdoor performance characteristics. The pieces merge the ideas of style and comfort together, featuring wide, straight arms, and ample and inviting depth ideal for lounging and relaxing. The new collection is offered in 7 Sunbrella Cast Colors designed to add a specific distinction to any outdoor design aesthetic or atmosphere. The removable and washable covers add to the flexibility & durability of the product. The Spazio Collection Performance Soft Seating collection is available to interior designers and architects through fine showrooms and sales reps worldwide.

Sail Away - Uniquely designed also for water use. The Spazio Collection is both stylish and flexible out of and in the water. The design & engineering allow Spazio to be buoyant and stable for exceptionally luxurious lounging and entertaining. Spazio is easy to move and quick to dry. The performance fabrics selected for this collection are UV and mold-resistant and engineered to resist the effects of chlorine, sun, and saltwater.

The Spazio Collection is the perfect place to relax and also float the day away.

The simplicity of 5 seating options completes the initial collection which is stocked in Fort Lauderdale, Florida. "We've been eyeing the soft seating category for quite some time from our Italian and Czech offices, but we wanted to be sure we manufacture the right product stateside with the quality production, performance, simplicity, and flexibility that the Hospitality, A&D, and Specialty Design Channels require," says David Di Meco. "Our goal was to create a soft collection that can incorporate casual, relaxed design, timeless tradition, and quality into a modern marriage and understatement of 'life' and 'style'. "Each piece can be used in full outdoor space, such as a patio, terrace, or deck, but also could be used indoor and can stand up to commercial traffic, pets and children. The collection's ease & flexibility fits well in desert states, as well as inner-city and coastal applications gaining several iconic hotels' attention and from Miami Beach to Los Angeles, Palm Springs, and Ibiza onto Mykonos and Milan. "We took a lot of time to develop the right durability and softness so we could also offer additional pieces and designs along the way in. The result is performance soft seating that is different from your typical 'what's out there and just as important...flexibility for properties" adds Di Meco.
