New York, New York City, Oct 26, 2021 (Issuewire.com) - Rebornbabystores inherits the tradition of creating high-quality realistic dolls since 2015 and launched vinyl-silicone™ reborn dolls. This unique material of dolls feels real and lifelike, and the price is far cheaper than silicone. Carley is a special product in the company's vinyl-silicone™ series of therapeutic dolls. It recently won the prestigious 2020 Nursing Staff Friendship Award.

It can help young mothers who suffer from Alzheimer's disease, want children, and children who lack playmates to bring warmth. Carley is handmade with vinyl-silicone™ vinyl, which resembles the look and feel of a baby's soft skin, 18 inches, and has a proportionally weighted rubber body, embracing him like embracing a real doll. The details of his textured skin, hand-painted nails, and hand-implanted hair are exceptionally real. His costumes and hats have also been carefully made to increase the overall tactile experience, and are detachable, and rebornbabystores provide a variety of reborn baby clothing,

baby bottles, diapers, etc. You can find all the products needed for reborn babies in rebornbabystores.

It is well known that comfort dolls can improve the mood of patients and provide calming effects. Reborn dolls are also great gifts for children, which can accompany them and cultivate their ability to take care of others. Dayshawn Gadson, senior marketing manager behind Carley

The confidence gained from the positive feedback from buyers. "The help that the Rebirth Doll brings to people is tremendous," she explained. "We understand from customers' feedback that our dolls have a huge impact on them, and we are very happy that our products have helped others"

Kayla Rebornbaby Doll is available for \$98.98, with a portion of each purchase supporting Alzheimer's research. Visit <https://www.rebornbabystores.com/collections/bestseller> for details.
