

64Crypto releases NFT Series I: Meet the Scientists

Los Angeles, California Nov 10, 2021 ([IssueWire.com](https://www.issuewire.com)) - [Dana Biasatti](#), the artist known as 64Crypto, is excited to announce the release of “Series I: Meet the Scientists,” the first series of her [NFT collection](#) entitled “OGSci Collection.” These collectible animated GIFS tell the story of six scientists who come together to work on the top-secret Martian Life Project to definitively determine if life exists on the Red Planet. There will be 7 series with 6 to 20 rare animated GIF NFTs in each series—and some surprises in between! The first 6 GIFs, making up Series 1, introduces the scientists.

Dana is a vertebrate palaeontologist and isotope geochemist at the University of Notre Dame. She is also a [graphic artist](#), who has done book illustration, album cover artwork, advertisements, logo design, fine art, and much more. She has even painted artwork on furniture that was featured in Architectural Digest. In this collection, her knowledge of science and her love for creating art come together in the OGSci (Original Gangsters of Science) Collection.

“I have had a love for creating, drawing, painting, and writing since I was a child. I’ve carried this love into adulthood and I’ve continued to create artwork throughout my journey as a scientist. This collection was inspired by my life experiences as a scientist --which has sometimes been a little wild! I decided to organize this NFT collection into 7 mini-series which represent the various steps of a fictional scientific project, the Martian Life Project. I hope you enjoy this story!”

Each series will take you through the steps of the Martian Life Project:

- Series I: Meet the scientists (Nov 4)
- Series II: The scientists at home (*Nov 20*)
- Series III: Scientists’ 1st meeting (Dec 7)*
- Series IV: Experiments begin (*Dec 21*)
- Series V: Data is compiled (Jan 6)*
- Series VI: Results are presented (*Jan 20*)
- Series VII: The after-party (Feb 5)*

*Drop dates are approximate.

Do they find the answer to one of this universe’s greatest mysteries? Wait and see!

10 % of each sale will be split among 2 charities that are chosen for each series. The Series I charities will be the Society of Vertebrate Paleontology Patterson Memorial Grant, which provides financial support for student paleontological fieldwork, and Mew Mew House cat retirement and hospice, which provides a home for the elderly and special needs cats who have become suddenly homeless.

ABOUT MINTABLE

Mintable is a next-generation non-fungible token (NFT) marketplace built on the Ethereum & Zilliqa blockchain. Launched in 2018, Mintable has pushed the NFT industry forward by being the first to design gasless minting, batch minting, and royalties, empowering artists and creators to monetize their work via NFTs. Mintable’s gas-free minting option allows the everyday person to get involved with NFTs without any prior knowledge in coding or upfront cost of minting an asset – a great way for everyone to get into crypto. In 2021, Mintable announced the backing of a list of high-caliber investors including renowned venture capitalist and television personality, Mark Cuban, Sound Ventures, a venture capital firm founded by and Ashton Kutcher and Guy Oseary, and TIME Ventures, the investment fund for

Marc Benioff. To date, Mintable has sold and auctioned works by Grammy-Award-winning artists, 20th-century avant-garde artists, and various high-profile artists and celebrities.
