

Breaking News: MobilityGuru Token (GURU) now trading:

London, United Kingdom Nov 25, 2021 ([Issuewire.com](https://www.issuewire.com)) - GURU now trading in Pancakeswap, coinsbit.io, and indoex.io

MobilityGuru is on the road to a fully integrative platform that gathers all mobility users and communities in one platform with endless functionalities.

MobilityGuru offers a fully functional platform presented on the web for all users living with a disability or professionals who offer a product or service to help them connect and interact directly. This is the first platform of its kind, presenting a unique opportunity to buyers and sellers in a blockchain-supported environment.

After the successful seed round of MobilityGuru, the team was able to achieve its soft cap and continue with further development of the platform. A global platform that has the ability to place ads globally and, locally within your country or scan for items from any country.

We are now focusing on the launch of the GURU token, which will further facilitate user interaction on the platform. The utility token will serve as a means of payment for products and services by the mobility community. And we're now providing an opportunity for the public to buy into our fast-growing platform and join the community of thousands of professionals and users around the world.

We offer our community to buy publicly and hold GURU at the right time in the development of the MobilityGuru project when the token represents a revolutionary movement in the mobility sector. GURU will be utilized in the MobilityGuru platform for transactions; currently, \$7.1 million of products are already listed for sale, chasing a global(10%) figure of \$211m.

Full integration in the platform will be completed by Q4 22 in the meantime enjoy the GURU staking option in Coinsbit.io. The GURU token can be summarized as a payment, utility, DeFi, and social token.

1- Benefit from the first-mover advantage - awesome

When all indicators and conditions gather to support your purchase decision, the earlier your entry, the higher your reward.

Every new successful technology faces the adoption curve when introduced to the market; the early adopters represent the group of people (users and token holders) who identify and capture the opportunity in the early stages. And create a level of certainty by actually using the product or reading the project whitepaper and users' feedback to know the value the technology brings to the market. The first-movers enjoy the leverage of the most considerable long-term profit window.

2- Benefit from the team's experience - balanced team

The token functionality impacts its usability and liquidity down the line. This is why you want to invest in altcoins that hold potential backed by the experience and expertise of the development team behind them. MobilityGuru is an already functional marketplace that aims to serve 1 billion people in the world living with a disability.

3- Benefit from the low cost of the token - low price

The GURU token starting price will organically increase as the marketplace mobilityguru.org becomes active from 1st Q 22. Acquiring the token at the lowest price gives the token holder all the advantages of utilizing/trading the token with the lowest market value.

4- Meet MobilityGuru's long term goals - use case is driven demand

We aim to make a significant change in the P2P mobility service and product market space. The MobilityGuru platform, products, and services will help individuals and governments meet the high demand and maintain the highest quality standards for the mobility community.

The MobilityGuru platform will continue to adapt the usage of the GURU token as, offering never before known opportunities in participating and making revenues through social interaction. This is real decentralized and incentivized ecommerce for a good cause!
