# Moolah Merchant Services and Credit Card Processing Integrates with Open Dental Payment Software Modernizing payments

Payments and patients come together. Moolah has developed a plugin that provides direct integration between Poynt and your Open Dental software. You can initiate a payment from within Open Dental, complete the transaction on the wireless Poynt

Los Angeles, California Nov 29, 2021 (Issuewire.com**)** - Modernizing payments for dental practices.
Moolah has partnered with Dental Success Network to provide your practice with a FREE Poynt Smart
Terminal, a simple flat rate, and no monthly fees. The world's first smart wireless and contactless
terminal has created a standard for an impeccable payment experience for dental practices and their
patients. Accept all the latest payment technology anywhere, including your operatories! Say goodbye to
manually adding transactions into Open Dental. Moolah has built a full-stack payment platform that
works seamlessly with Open Dental. Process payments to your Poynt terminal(s), create automatic
payment plans, manage your in-house memberships, and collect outstanding balances by text, email, or
directly through your website. All payments post to Open Dental automagically! Your Moolah account
has direct integration with leading dental solutions, included at no additional cost.

Payments and patients come together. Moolah has developed a plugin that provides direct integration
between Poynt and your Open Dental software. You can initiate a payment from within Open Dental,
complete the transaction on the wireless Poynt terminal, and the payment is automatically recorded in
Open Dental. Open Dental provides powerful, flexible dental practice management software at an
affordable price. Providing powerful, flexible, affordable practice management software & exceptional
support to dental offices worldwide. Open Dental Software is a powerful, flexible, affordable Dental

Practice Management Software. Proudly supporting dental practices of all sizes and varieties all over the world. In the past, the only options for dental practice management software were expensive, rigid, and proprietary. Dr. Sparks, our founder and a dentist himself, wanted something better. He longed for a program that was affordable, customizable, and robust in its capabilities. Realizing that a program like that did not yet exist, he set out to develop one on his own. In just a few years, that self-taught programmer and dentist had accomplished his goal and Free Dental was born. While using the program during development in his dental office, Dr. Sparks relied heavily on critique from his own dental hygienists, assistants, and office managers giving him unique insight into what makes a dental practice management software user-friendly, efficient, and effective for everyone in the office. Dr. Sparks felt that every dentist should have access to such a powerful, flexible, and affordable program. Thus, Free Dental became Open Dental Software, an open-source dental practice management software open to change, open to progress, and available to all. Users were then encouraged to offer feedback and suggestions to facilitate continuous improvement and Open Dental users were so satisfied with the results, news of this innovative program spread like wildfire in the local and online dental community. Today, Open Dental Software employs a diverse group of over 150 engineers, support techs, dental professionals, trainers, IT specialists, conversion specialists, and more. An estimated 20,000 dental practices in countries around the world use the program. Innovative improvements are frequently released based on user feedback and industry standards. Open Dental and its staff are passionate about simplifying practice management and dedicated to providing an unmatched product with exceptional support.

Running a small business can be simultaneously both rewarding and somewhat daunting. **Accepting credit cards for small businesses** can take your business growth and success to the next level, allowing for streamlined payments, easier accounting, better customer service, and greater customer satisfaction. As such, it's very important to select the very best merchant services for **credit card processing for small business** that is secure and accurate.

In 2020, it is simply not possible to do business without accepting credit card payments. According to a recent survey, around 70% of consumers prefer credit or debit cards over any other payment method. This means that if you are not set up to allow your customers to pay by card, you risk losing their business. In business, it is critical to lower the barriers to making a purchase and therefore encourage your customers to make the sale. Not being able to pay cash can be a large barrier to many, meaning you may lose out on a large number of sales! Additionally, card payments have a number of other advantages over cash and other payment options. Accepting cash payments can carry a variety of practical problems, such as always needing to have changed. It also has security concerns, leaving you open to theft. Card payments are secure, reliable, and instantly. This is highly preferable if you are accustomed to invoicing your clients and waiting two or four weeks for them to pay. It also means that you are assured of the payment, so you don't need to worry about your clients defaulting on their debt entirely!

You've worked hard to build your business, and now it's time to get paid. But keeping a steady cash flow is often the number one worry for small business owners. So we've stepped in to help, researching credit card processing solutions that get you your funds most efficiently.

And the market is crowded with credit card processing companies, all of whom make ambitious claims about their pricing, flexibility, customer service, equipment offerings, and mobile credit card processing capabilities. The quantity of information can be overwhelming.

We're here to sort the hype from reality. We've got the skinny on some of the best-known names in the market – the pros, the cons, and the bottom line that will help you compare processors and make the

choice that's best for your business.

Moolah offers clients the **best credit card processing for small businesses**, using the Poynt Smart Terminal system for accepting credit, EFTPOS, and debit card payments. The system settles payments into your business bank account promptly and enables you to keep track of payments. You can accept payments without being restricted by stringent requirements, no matter how large or small your business may be.

The credit card processing system provided by Moolah is affordable, secure, budget-friendly, simple to use, and involves no up-front fees or contracts for you to sign. You choose the services that best suit your individual needs. It is a fast, accurate, and seamless way for you to accept credit card payments anytime, anywhere, whether you are completing transactions in-store, at home, on the road, or online. All payments are delivered via a single merchant account in partnership with Authorize.net. If you run a retail or restaurant business, you will also receive a free iPad POS app.

With Moolah, you can accept MasterCard, Visa, American Express, Diner's Club, JCB, and Discover credit card payments. We offer our services throughout North America, The EU, UK, and Australia.

Contact us at Moolah today to discover more about **credit card processing for small businesses**. We provide the least expensive, simplest, and fastest route for payments from your customers to you.
