Seoul, South Korea Dec 8, 2021 ([IssueWire.com](https://www.issuewire.com)) - [Clutch](#), an IT outsourcing platform based in Korea, is the latest space for outsourcing IT projects to qualified and vetted professionals based across the world. Posing hard competition to other outsourcing platforms, Clutch, founded by parent company Gudax LLC, is showing a new world of possibilities in IT outsourcing with \$2.5 million worth of new opportunities.

"We achieved a project transaction volume of about \$900 million by December 2021. Our main customers range from large companies such as Airbnb, Uber, and WeWork to individuals, and professional development teams in each field, from small prototype development to large DBMS optimization projects are connecting quickly", says a spokesperson for Gudax LLC.

Clutch not only creates technical opportunities, but also provides better results. Its mission is to create global talent that forms the core of every business, big or small. The developers that work on the projects here are evaluated and vetted on a project-by-project basis to solve specific needs on a one-off basis.

Gudax is a highly sticky, double opt-in platform with long-term relationships and recurring use. It is thus attracting highly skilled professionals divided into the global team to help clients build their businesses. These global teams propose reasonable budgets, and offer flexible commissioning from small jobs to enterprise-grade turnkey solutions.

The platform is also freelancer-friendly, helping them find work at a much quicker rate. It provides access to quality, flexible projects from the company's global network. The company ensures timely payment, security, and peace of mind with the Gudax Payment Protection.

"With Gudax, IT freelancers can build a solid reputation while establishing long-term credibility and relationships with several clients. The platform presents several growth opportunities, insights on in-demand skills, and emerging areas," said the spokesperson.

Gudax has emerged as the leader when it comes to hiring quality talent and getting global access to a verified group of IT professionals across categories and price points. The setup allows quick access to this talent database, giving the client proposals within minutes.
