A Registered Nurse (RN) is a nurse who has graduated from a nursing program and met the requirements outlined by a country, state, province, or similar licensing body to obtain a nursing license. RNs fulfill a variety of job duties. In addition to their primary role in treating and caring for patients, their responsibilities also include educating patients and the public about a variety of medical conditions, as well as providing emotional support and advice to the families of their patients. Other RN job functions include leadership, research, performing diagnostic tests and analyzing results, operating medical equipment, administering medications, recording patients' symptoms and medical histories, and assisting with patient rehabilitation and follow-up.

On a more personal note, Kayla attributes her success to taking care of others and making a difference.
