

Son Of Hades: Binance Smart Chain's newest token, with Cold Wallet and BUSD rewards

Son Of Hades' much-anticipated presale will take place on December 14, 2021 at 4:00PM UTC. The \$SOH token will go live on PancakeSwap on December 15th at 4:00PM UTC.

Abuja Federal Capital Territor, Nigeria Dec 11, 2021 ([Issuewire.com](https://www.Issuewire.com)) - [Son Of Hades](#) is a staking and rewards token created on the Binance Smart Chain, with a mechanism that automatically distributes 8% rewards in BUSD to holders.

The team decided to hold a small presale in order to provide adequate liquidity for the protocol and maintain constant buying pressure on the token even after the fundraising period ended. The Buy-Back function will aid in avoiding dips following Pancakeswap's launch. Son Of Hades Token has a lot of potentials and could be one of the best projects in the last quarter of 2021.

Pinksale, a leading Launchpad that has assisted thousands of projects in successfully creating tokens and holding successful presales, will host the upcoming sale. Investors interested in participating in the fundraiser can go to the Pinksale Launchpad page and contribute BNB tokens to obtain their first \$SOH tax-free.

After the presale, the Son Of Hades team intends to apply to cryptocurrency ranking websites Coingecko and Coinmarketcap. Other listings will follow, providing easy access to the \$SoH token to the crypto community.

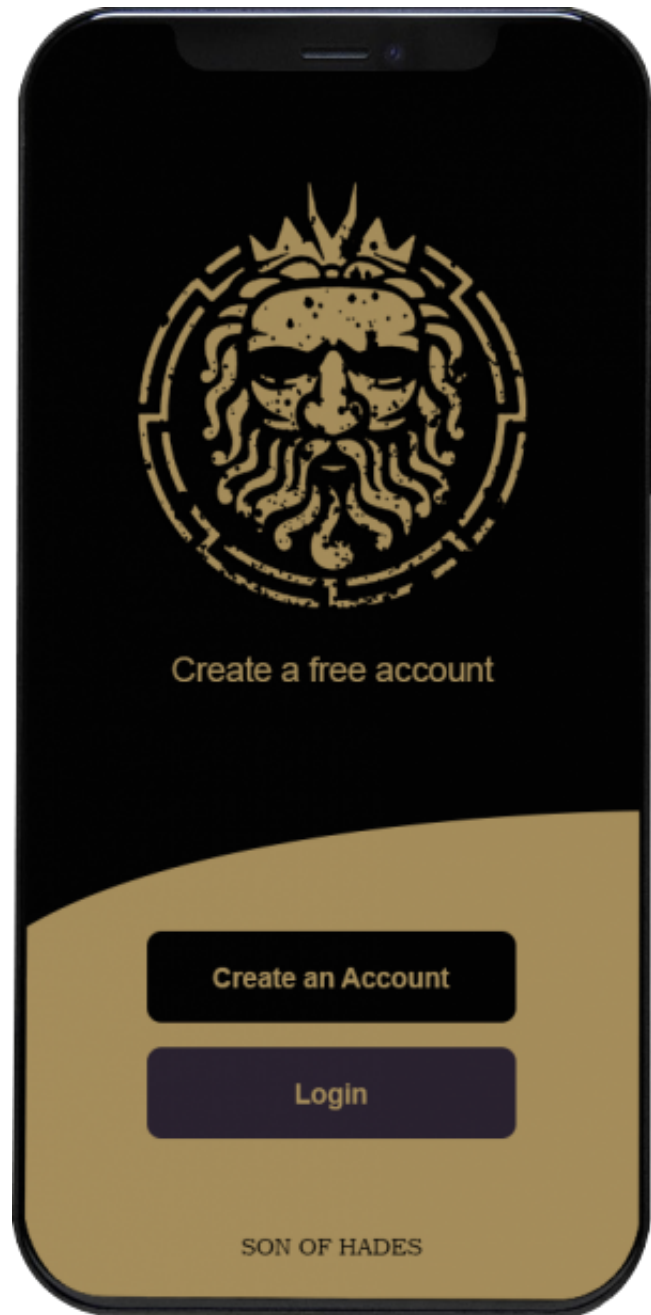

[ABOUT SON OF HADES](#)

While everyone is scrambling to find the next big thing, SON OF HADES is proud to be one of the highest paying reward tokens on Binance Smart Chain, automatically rewarding its holders in the form of Binance Pegged BUSD. Since BUSD is a stablecoin pegged to the US Dollar it will never shift in price, making it a great choice for passive income.

As a hyper-deflationary token that automatically rewards investors with a stable passive income for holding, SON OF HADES helps to reduce the risks involved with cryptocurrency market volatility. Holders can keep earning during a crypto bear market as token price does not affect the BUSD rewards.

Over time, holders can earn enough BUSD rewards to cover their initial investment, turning their investment into a cost-free asset. A two-pronged fee system creates a sustainable ecosystem to allow the BUSD rewards collected from every buy and sell order to continue flowing for the life of the token.
