Get to know Pathologist Dr. Stanley J. Geyer, a nationally-recognized expert in medical-legal pathology and pathologist at Indiana (PA) Regional Medical Center

New York City, New York Dec 22, 2021 ([IssueWire.com](https://www.issuewire.com)) - Dr. Geyer created Geyer Pathology Services, LLC, a nationwide consulting practice in pathology, fifteen years ago.

An experienced pathologist, Dr. Geyer provides services at the Indiana Regional Medical Center in

Indiana, Pennsylvania, where he has worked since 2007.

Indiana Regional Medical Center (IRMC) has been serving Indiana County and surrounding communities since 1914. As a nationally recognized employer, IRMC continues to meet the needs of patients and employees alike. IRMC maintains its commitment to serving the region by continually reinvesting in its facilities, technology, and people in order to provide the highest levels of care possible. IRMC's vision to be the best community healthcare system in the country is the cornerstone of our commitment to caring.

Dr. Geyer has been a pathologist for over 40 years. He received his medical degree (MD) from Thomas Jefferson University in 1974. He continued his education with residencies at New York University Medical Center (1974-1975) and University of Pittsburgh Health Center (1975-1976). Subsequently, he completed a fellowship in Immunopathology and Experimental Pathology at the University of Pittsburgh School of Medicine in 1977.

As a highly educated pathologist, Dr. Geyer was a pathology professor at the Georgetown University School of Medicine from 1990 to 1992. Concurrently, he served as the Medical Director of Laboratory Services for the Georgetown University Hospital. Dr. Geyer has also served on the pathology faculties at the Schools of Medicine of the University of Pittsburgh and the University of Washington and has held leadership positions in pathology and laboratory departments in Pittsburgh, PA, and Salt Lake City, UT.

A pathologist is a physician who specializes in the causes and paths taken by different diseases in order to diagnose an illness. They determine the characteristics of a disease through the study of biopsies of diseased tissues or of bodily fluids.
