

CTS Announce the launch of its new PC Monitoring Software “PC Monitor Pro”

Norwich, Norfolk Jan 18, 2022 (Issuewire.com) - We have launched a New Premium Product for every Business owner.

The Product is “PC Monitor Pro” which enables the management team to uncover hidden productivity killers thereby increasing efficiency and leveraging productivity.

CTS has developed PC Monitor Pro in response to questions we get asked time and time again.

What happened on this PC, When did it happen and what was this member of staff doing.

With working from home becoming the new normal, there is a need to ensure productivity doesn't drop due to the distractions at home.

While some businesses report an increase in productivity and a better work/home life balance there is always the chance that some staff will take advantage.

In the office, the average UK office worker is only productive for 2 hours and 53 minutes out of the working day... “Vouchercloud Report 2016”

You can [remotely monitor](#) by department or individual users. You can monitor employees that are off the corporate network or working remotely at home. You can even playback a video of someone's entire day.
