

Get an all-in-one solution for astrology and horoscope service with Astrology API Reports

Delhi, India Jan 11, 2022 ([Issuewire.com](https://www.issuewire.com)) - Astrology and Horoscope is one of the prime aspects of people's life and everybody is seeking more accuracy in it. Considering and need and demand, Astrology API Reports is releasing their long-awaited PDF API for astrology. With this latest API, the users are able to get a complete astrological analysis with 70 pages which can be availed from any website with a single API request. The organization is offering all the data related to mantras, Kundli, horoscope, and astrology to prediction with accuracy. The versatility of the API makes it compatible with the website and mobile applications, also at an affordable price.

Astrology API Reports offers a reliable and trustworthy source for astrology services including all the aspects of Vedic Astrology and Western Astrology horoscope. There are also options for Daily Horoscope, Tarot Reading, PDF report regarding kundlis and mantras along with numerological

statistics. The statistics are based on Vedic principles and Indian astrology including all dashas and yogas. Not only Indian references but the API is also capable of offering a complete analysis with western astrology and zodiac reports along with solar and lunar returns. Whether is it about generating a birth chart or even finding a life partner; this all-in-one API can offer all data. Its interpretation reports and forecasts can offer higher accuracy with more than 20 types of Astrology reports regarding business, health, career, relationship, life partner, and other aspects.

It is one of the simplest yet powerful astrology API-centric platforms that offers customizable options to offer care and professionalism to every client. It is a complete white-label API that works at the backend while seamlessly integrating with other websites. Being a cloud-based software, Astrology API Reports is making it fast, scalable, and secure for every client. The company also offers a support team available at any hour of the day.
