

Republican Jesus NFT Club: Experiment in Controversial Community Building

(01.22.22 Soft Launch)

Dallas, Texas Jan 5, 2022 ([Issuewire.com](https://www.issuewire.com)) - *The success of Doge and Shiba Inu is a testament to the power of “meme-based community building” and they demonstrate what a cohesive and loyal community can do to create wealth for many people. Think about it: what was in the beginning just a popular dog meme became capitalized upon to create two historic cryptocurrency projects – one piggybacked on the other – and now they are worth over \$30 billion combined!*

The time is drawing near to January 22, 2022, the Soft Launch of the Republican Jesus NFT Project. There are 13 unique, 100% artist-rendered, NFTs that will be included in the launch. Additional details will be posted on their [Discord](#) Server at <https://discord.gg/mxCwkXrQ>. Be sure to check on the [Opeasea](#) collection for how to purchase: <https://opensea.io/collection/-republican-jesus>.

Excitement is building up and the project creator, artist F.A. Chekki, is getting tremendous feedback from folks on social media both on [Reddit](#) and on [Twitter](#)! People definitely want to obtain free NFTs in the giveaways, but that is to be expected in this hot and frenzied emerging market!

New NFT projects need to stand out. The growing followers in just the last few weeks since announcing the release definitely think that Republican Jesus NFT Club accomplishes that! One thing the artist, however, wants to stress is that he *does not want to be the project that overpromises and under-delivers*. So his strategy is to stay true to his roadmap and vision for the project and as such he wants to remind all that “this is first and foremost an artist and community-driven endeavor.” And, he adds, “while the very new community is just starting to grow, remember that it takes time to develop and market a new NFT project to reach sales goals and values.”

If you missed the giveaway on January 11th, you will have a chance to purchase the exclusive NFT drop that is not included in the 13 unique images for the soft launch. There will be, fortunately, a very attractive price for a limited time, but there will also be a very limited supply. So be sure not to miss the drop before the soft launch event.

In close, the Republican Jesus NFT Club/project is built upon many of the same principles and similarly the same foundation as DOGE and SHIB, but as applied to NFTs. Read the [whitepaper](#) to find out more at:

RepublicanJesus.info!

This truly is a new NFT project for 2022 that you will not want to ignore! Once the word really gets out on this, the community anticipates that much prosperity will result for all of those involved.
