

BigCash Launching new Decentralize System GigaSwap.

BigCash now available on MetaMask and Trustwallet

Tallinn, Harju Mar 20, 2022 ([IssueWire.com](https://www.issuewire.com)) - GigaSwap the makers of BigCash Token, today announced that they are going to adopt a completely decentralized system in the future. This means BigCash will now be available on popular DEX exchange systems like Uniswap, pancakeSwap, and many more.

“ We have invested in a new business model and this will allow Bgc to available on MetaMask, trust wallet so user can easily trade on different DEX Platform. We also come with our in-house DEX Platform GigaSwap next month. This investment will allow BigCash to be a Global coin in the coming month Said owners of the BGC.

The new facilities will be equipped with state-of-the-art different blockchain platform .”we are pleased to offer our customers with all new without any extra charges” Said owner of the Coin.

Bigcash has been involved in the semi-decentralized systems since Aug 2018. It is known for such products as Kpay wallet , gigEx , MYRT . BGC is in a Great position to be achieve the best valuation

In this occasion we also start our new website <https://bigcashtoken.com> and new Social platform accounts for such clients community.

About BigCash

Founded in 21 Nov, 2018 , and very popular in the Malaysia and South Asia region . BGC was also integrated with different E-commerce platform , offline payment gateway from in-house Kpay wallet. It was also listed on turkey-based centralized Exchange and recognized token on Etherscan, Where valued at USD 2.22 . Currently this token trade P2P and very popular in specific community.
