## Cesar A. Castillo, MD, an Anesthesiologist with Baylor St. Luke's Medical Center

Get to know Anesthesiologist Dr. Cesar A. Castillo, who serves patients in Houston, Texas.

**New York City, New York Mar 21, 2022 (Issuewire.com)** - A top professional in the field of anesthesiology and critical care medicine, Dr. Castillo is in practice at Baylor St. Luke's Medical Center in Houston, Texas. He also serves as a Clinical Assistant Professor at the Baylor College of Medicine and is on the teaching staff of the Cardiovascular Anesthesiology & Critical Care Medicine Fellowship at the Texas Heart Institute.

Baylor St. Luke's Medical Center is an internationally recognized leader in research and clinical excellence that has given rise to breakthroughs in cardiovascular care, transplantation, mechanical circulatory support, and more. Their team's efforts have led to the creation of many research programs and initiatives to develop advanced treatments found nowhere else in the world.

Back in the early days of his academic career, Dr. Castillo earned his medical degree from the Santo Domingo Institute of Technology in the Dominican Republic in 2001. Upon relocating to the United States, he completed his residency in anesthesiology at the Boston University Medical Center in 2010, and his fellowship in critical care medicine at the Beth Israel Deaconess Medical Center in 2012.

An expert in his field, the doctor is board-certified in anesthesiology and critical care medicine by the American Board of Anesthesiology (ABA). As the certifying body for anesthesiologists since 1938, the ABA is committed to partnering with physicians to advance the lifelong learning and exceptional patient care. Its mission is to advance the highest standards of the practice of anesthesiology.

Anesthesiology is the medical specialty concerned with the total perioperative care of patients before, during, and after surgery. It encompasses anesthesia, intensive care medicine, critical emergency medicine, and pain medicine. Anesthesiologists have the primary responsibility of monitoring the patient's vital signs during surgery. In addition to basic measurements such as pulse, blood pressure, and temperature, they measure the patient's respiration.
