California, United States Mar 1, 2022 ([IssueWire.com](https://www.IssueWire.com)) - Diamond Veneer Review (Legit Or Scam?)By [Ansar](#) / March 15, 2021

Diamonds are a girl's best friend ... yeah that's what everyone says and of course, we can't deny the love of women for diamonds. But what also needs to be brought to light is the fact that diamonds aren't always affordable for everyone out there.

What's the alternative then? Most likely a tacky-looking Cubic Zirconia, right? Nope, not anymore. Diamond Veneer will change your opinion about Cubic zirconia forever. You must be wondering what's so exceptional about their CZ. Well, don't worry because we'll scratch everything about Diamond

Veneer beneath the surface.

So let's get started!

Background of Diamond Veneer

The creative mind behind Diamond Veneer who deserves all the praises is Yaacov (Jacob) Hassidim. He is the president of this US-based company that has revolutionized the idea of Cubic Zirconia.

Diamond Veneer will get all the heads turning and the best part is that it will happen without you breaking your bank. You can show off all the sparkle and shine because hardly anyone would be able to guess the reality.

Now how does Diamond Veneer achieve the most perfect diamond look alike? They treat the regular Cubic Zirconia with a veneer of carbon diamond particles and crystalizing around the stone. This helps in achieving a G color on a diamond scale unlike the otherwise 'too white' CZ.

Diamond Veneer has gained much popularity over the years in the media as well. You can check all the media features [here](#). All of this means now you can flaunt the dupe with the confidence of a real diamond!

Website Navigation

The website of Diamond Veneer is designed very nicely. It will be easy to operate for each one of you because the website has been designed while keeping in mind the customers. It isn't overcrowded, unquestionably the best part.

Diamond Veneer has a simple website with an ample amount of empty spaces contrasted with a single color to make it look fresh and user-friendly. On the home page, you will find their 4 Featured Collections that include Earrings, [Rings](#), Bracelets, and [Necklaces](#).

There's one Curated Collection as well on the home page. This includes Minimalist Jewelry, [Dancing Diamond Veneer CZ](#), and [Zirconite Fashion Jewelry](#). Besides these, there are a few additional categories that you'll find in the navigation bar such as [14k Gold Collection](#), Zircomania, Loose Stones, etc.

They don't have an overwhelming amount of filters on their website. For instance, earrings can be filtered as Canary, Hoops, Diamond Simulant, Man Made Diamond Earrings, Minimalist, etc.

The items can be sorted alphabetically, price-wise, or old to latest. In most of the jewelry, you can customize the cartage of the stone. The overall process of ordering from them is pretty convenient.

The website of Diamond Veneer lacks a bit in categorization, however, overall it is well designed. Has all the essentials for easy website navigation!

Store Location

Diamond Veneer is mainly an e-commerce store with its headquarters located in Los Angeles.

850 S Broadway, 1106, Los Angeles, CA 90014, to be precise.

Shopping from them means you will need to head to their website or rather their online store because that's the only place where they sell.

Physical stores are always appreciated but perhaps, most brands have succumbed to the e-commerce trend and hence, don't feel the need to have a physical presence. Diamond Veneer is no different!

Quality of Diamond Veneer

As far as the quality of Diamond Veneer Jewelry is concerned, we'll have to say that they're doing a pretty good job at meeting the expectations of their customers.

9/10 reviews on the Internet are in favor of Diamond Veneer which is actually surprising. We rarely see such a solid reputation for an online store. Most of the time, the reviews are two poles apart for online stores. But anyway that's not the case with Diamond Veneer.

Their jewelry is not only beautiful but also durable and long-lasting. The treated Cubic Zirconium by Diamond Veneer is actually the finest faux diamond. Most experts are left confused at the sight of these Diamond Veneered CZ and rarely recognize the reality.

The designs of rings, necklaces, and bracelets are also brilliant and elite. However, their inventory is not very huge. More options and variety can be added for covering a wider clientele.
