

DOTS Tech Systems partners with Caleedo

DOTS and Caleedo announce partnership to provide digitized workplace and patient care solutions

Dubai, United Arab Emirates Apr 5, 2022 ([IssueWire.com](https://www.issuewire.com)) - DOTS is excited about this partnership as it opens up a new and rapidly expanding segment of the IoT industry, strengthening their already vast portfolio, whilst giving Caleedo an opportunity to partner with a widely recognised technology company with a strong presence in the middle eastern market.

As a part of this partnership, DOTS is now delighted to launch two unique digital applications, Hygieneo – a first-of-its-kind and CE certified hygiene solution with wi-fi enabled IoT meters that measure, monitor, and report Indoor Air (IAQ) and Surface hygiene levels for any commercial building. Hygieneo also creates user-configurable dashboards which can be broadcasted in common areas of buildings. This application is best suited for workplaces/hotels/airports/schools/auditoriums or any such public place or commercial building.

The second application is a hospital-ready patient visitation application, Vizeit, which offers both virtual visitation and scheduled hospital visit management solutions and is a mobile-first application.

Parikshit Roy, Chief Executive Officer and Co-Founder of Caleedo said “We are excited and upbeat about our association with DOTS. Together we can offer Caleedo’s uniquely differentiated and ‘first-of-its-kind’ digital applications to the discerning and forward-looking customers in UAE, ably backed by the established reputation of DOTS in going that extra mile in bringing ‘delight’ customers they serve”

The CEO of DOTS Dheeraj Singh adds, “We are excited about this partnership as it expands our portfolio of Smart City solutions in the new segment of verticals for both our Government and Enterprise clients. Our collaboration with Caleedo will bring onboard access to domain expertise in healthcare and

workplace environment analytics. These are very significant technologies in the current era”

About Caleedo

Caleedo offers a digital playbook to orchestrate processes & use cases for multi-stakeholder service businesses which have a high degree of consumer touchpoints and experience impact. Founded by industry thought leaders, Caleedo has several unique solutions that are disrupting the market & offering innovative solutions for problems that have not yet been addressed.

Caleedo has two platforms: Caleedo Health for patient care services at hospitals & Caleedo Express for workplace and enterprise services. Facility management and patient care in hospitals are some of these high-impact service businesses which are global in nature & provide large transformation opportunities.

Caleedo is changing the way the mundane aspects of business are conducted by using IoT solutions to digitize workplaces and patient care services. Caleedo brings to practice and domain expertise to the workplace. Caleedo aims to empower business administrators with innovative digital solutions to create an ecosystem that creates value for all levels of service providers and recipients
