

Inspired by “Ready Player One”, FantaVerse is making an OASIS-grade metaverse a reality

Hong Kong, Hong Kong S.A.R. Apr 5, 2022 ([IssueWire.com](https://www.issuewire.com)) - The epic movie, “Ready Player One”, set in the year 2045, sees its populace escaping from the chaos of the real world by immersing themselves in the OASIS metaverse. The sensational movie plotline, along with the heroes’ phenomenal gaming prowess pulled at the heartstrings of moviegoers worldwide and captured the imagination of gamers everywhere.

“FantaVerse, a creation of Houston-based Meta Fantasy, is the first-ever metaverse game to realize an OASIS-grade Virtual Reality (VR) environment.”

Creating the successful concepts inspired by OASIS is no mean technological feat. The underlying infrastructure must be capable of supporting a massive number of online players simultaneously whilst processing game data and gaming physics in real-time. It also has to address the perennial challenges of social interactivity in the metaverse.

FantaVerse players can choose to participate in various missions and quests whilst meeting new friends in cities spread across 480 planets.

“To participate, you just need to purchase and own one (or more) of the limited edition official NFT characters, available for sale at a list price of USD100, on either the BINANCE NFT MARKETPLACE or the official FantaVerse NFT Marketplace.”

To maintain the safety of the game’s assets, all the data is encrypted and authorized using blockchain

technology. In other words, all assets are held by their respective owners in perpetuity and they can be passed on to successive generations of players. Compared with centralized game providers, this is a huge step forward.

“FantaVerse is a light and user-friendly browser-based game.”

Players do not have to download a large APK file and there is no need for expensive processing hardware. An incredible experience can be achieved since registering and playing on different devices is done easily without all kinds of hardware complexity and difficulties that usually plague gamers. A mobile device that can stream HD movies comfortably will be sufficient.

A player can enter the FantaVerse game wearing FantaVerse’s 3D VR/Augmented Reality (AR)/Mixed Reality (MR) device i.e. MR FantaGlass. Though optional, it is highly recommended for any player who craves a truly immersive next-gen 3D VR experience.

In addition to providing an immersive gaming experience, MR FantaGlass supports real-time communication, enabling players to interact with other players seamlessly in the FantaVerse metaverse.

The experience offered by FantaVerse with MR FantaGlass provides a leading-edge immersive metaverse gaming experience that surpasses products provided by most major game makers today and most social applications don’t come close.

“FantaVerse will launch its Alpha version at the end of April 2022.”

The Alpha release includes primary functions such as social networking, completing missions with teammates, and gaining tokenized bonuses that distribute storage on the blockchain.

In the near future, FantaVerse tokens can be traded on well-known exchanges, empowering players with a clear pathway to earn as they play i.e. PLAY-2-EARN.

For early birds, the FantaVerse platform will allow gameplay with lower levels of difficulty and provide different kinds of awards as incentives.

The first batch of FantaVerse NFT holders will have the opportunity to enter the FantaVerse metaverse. They will also be the first in the universe to witness the game’s progressive development firsthand.

ABOUT META FANTASY

Meta Fantasy is a metaverse gaming company registered in Houston, Texas, USA. Since its establishment, the company has developed rapidly and has received investments from renowned venture capital giants including Draper Dragon and Turing Capital.

Meta Fantasy aims to become a metaverse gaming platform and provider based on the ideals of a DAO.

Its current ecosystem covers the USA, Japan, Korea, and key countries in Southeast Asia. It is expanding to other countries as more gaming communities reach out to Meta Fantasy.

Meta Fantasy adopts a distributed business management model and the company is made up of more than 100 team members from all over the world. Website: www.metafantasy.online
