

Neddie Smith UK Artist Is Focusing on...

Gloucester, Gloucestershire Mar 5, 2022 ([IssueWire.com](https://www.issuewire.com)) - Young up and coming rap artist Neddie Smith was born and raised in the UK. Neddie didn't have the easiest life while he was growing up. Being taken away from his family at a really young age and raised in foster care definitely had an effect on him. Music was his only escape during that time and it's what ultimately kept him from going down a bad path. He was heavily influenced by grime and rap music and eventually started creating his own music. Neddie doesn't see himself as the type of person who has any regrets, and instead believes that everything happens for a reason. The rapper also thinks that learning as you go is a part of the musical journey so he's not too worried about getting advice. He's focusing on putting in the time and effort it takes to perfect his craft and have a successful career as a musician.

As an artist, Neddie appreciates other musicians are able to share stories through the music they create. He's inspired by artists like Post Malone, Justin Bieber, and Juice Wrld because they took their visions and turned them into reality. And now he's working on creating the same kind of success for himself. Neddie is currently working on his next single which will be based on his life. And he's hoping to be able to release the record sometime within the next five months. The independent rapper is planning and preparing for his future as a successful music artist. He can envision himself becoming a highly successful hip hop artist that sells out shows while still being an artist that fans can relate to. And Neddie is also planning on opening his own record label so he can sign other artists that have a story like him.

So far, one of the biggest obstacles Neddie has had to face is the fact that he is in the UK where it's harder to get noticed because it doesn't have as big of a music scene as the US does. But this hasn't stopped him from pursuing a musical career and giving it all he's got. And he's proud of the accomplishments that he's already started making as a solo independent rapper. One of his proudest accomplishments has been that he was able to get his music on all of the major streaming platforms without any help. Neddie is also proud of the fact that his first official single received over 13,000 streams. He's already come a long way since he first started out with no real knowledge of the music industry. But he's managed to learn a lot of very helpful information and tools that can help with his musical career. Make sure you follow Neddie and stay caught up on his upcoming releases.
