

Why Does Chimney Restoration of Kansas City make the Right Choice for Chimney Inspection?

Olathe, Kansas Mar 8, 2022 ([Issuewire.com](https://www.issuewire.com)) - There are numerous important things you can do to take care of your chimney and fireplace system. Did you know that after you burn a fire, you need to clean out your firebox, but don't get rid of all the ashes? The ashes can actually help to nestle the coals in and support your fire burn better.

You should ensure your dampers are open when you're burning fire and make sure that they are closed when you aren't burning a fire so that the warm air in your house doesn't depart the chimney. And most importantly you need to have your chimney cleaned and inspected yearly by the professionals? Counting on the condition of your chimney, how frequently you got it cleaned, and what's happened since the last time you've had it checked and swept, you can request a level one, two, or three types of inspection.

For the [chimney inspection Overland Park](#), you can contact Chimney Restoration of Kansas City. We have garnered a rock-solid reputation as the best company. Here, you will get the most professional chimney inspection, where we will be reviewing all the diverse aspects of your fireplace. Differing from the bottom of your chimney to the top, our certified chimney inspectors in Olathe Kansas will ensure that your chimney never encounters any issue.

If you have your chimney cleaned and inspected regularly by the professionals and if you offer the utmost care to your fireplace in between inspections by cleaning the firebox after every burn or two, assuring the perceptible parts of the fireplace and chimney are swept and working, and burning the proper types of wood, a level-one chimney inspection will make the right choice.

In this level of inspection, our professionals will ensure all the easily accessible parts of your fireplace and chimney are in pristine condition. They check for obstacles and creosote buildup and ensure your chimney is healthy. Many chimney fires don't get the sufficient oxygen that is needed to go beyond your chimney. When you call Chimney Restoration of Kansas City, we will inspect for proof of an undetected chimney fire. If we find any evidence, or if you are switching ownership of your home, a level two chimney inspection will be needed.

This level of inspection incorporates the employment of a video camera to examine the interior of your chimney. By using video equipment, our experts can detect any structural damage a chimney fire or any other natural occurrence may have caused and can make suggestions for repair work. The third level of the inspection demands significant chimney reconstruction. This level may need some components of your chimney to be eliminated so that affected areas can be accessed without difficulty. Do not let chimney-related issues scare you.
