

www.canada-visa-online.org Introduces Quick Process Of Issuing Canada E-Visa

Vancouver, British Columbia Apr 12, 2022 ([IssueWire.com](https://www.issuewire.com)) - Any green cardholders of the US, who require an eTA Visa or Electronic Travel Authorization to travel to Canada, can now issue an e-Visa easily from Canada Visa Online. These applicants do not need to present any tourist Visa or Visitor Visa. There are some relevant documents that a green cardholder needs to showcase while applying for an online visa. These documents involve the green card and passport issued by the country in support of their citizenship. The Canada eTA offers all the similar functions that Canada Visa has but without all the hustles. The person having a green card and willing to issue Canada Visa Online is not required to visit a Canadian Embassy or Consulate for a Visa. Immigration, Refugees, and Citizenship Canada (IRCC) issues the official document of Canada eTA.

www.canada-visa-online.org has made the entire process online. A person can visit Canada and stay up to six months with an IRCC issued eTA. Though the visit and the stay can only be secured by presenting a green card and passport. At the entry point, some questions will be asked like if you have sufficient funds and resources to support your stay and the intentions or purpose of your visit. The user-friendly process for Canada Visa applications online offered by this company will help one get an e-Visa within a short timeframe. Once you submit the application, the visa will be ready within 48 hours. Yet in some cases, the process is a little lengthier which may take up to 96 hours maximum.

This company has offered a reliable updated set-up for their website. The technology assures the confidentiality of their client's privacy. Along with this, they also offer safety throughout the application processes including the payment procedures. Their customer support is available round-the-clock so that they can assist the applicants with their needs. The company is functioning since August 2015 and has successfully assisted many visitors with their visa requirements. The user interface is built up with multiple language options. To check further facilities, browse <https://www.canada-visa-online.org/VISA/>.
