

Closeloop Ranked Among Top 10+ Mobile App Development Companies in India 2022

Mountain View, California Jun 1, 2022 ([IssueWire.com](https://www.issuewire.com)) - [Closeloop Technologies](#) adds another achievement to its list of accomplishments. AppDevelopmentCompanies.co includes Closeloop in the list of Top 10+ Mobile App Development Companies in India 2022.

Trusted by patrons and ranked among the top mobile app development companies, Closeloop is a customer-focused technology company with a rich industry experience of more than 11 years. They have proved their potential and worth by serving clients globally and attaining 5-star ratings on multiple review platforms.

With a mission to produce and deliver intelligent IT solutions for businesses of all types and sizes, they want to create business process management as simple as a walk in the park.

Acquiring a badge of recommendation from one of the trusted directory platforms is a sign that the company is progressing, and people are talking about it and spreading the word. As they say, good work doesn't go in vain. It brings appreciation and satisfaction along with a lot of references for new work.

Gaurav Sharma, the Chief Marketing Officer (CMO) of Closeloop Technologies, credited the team, members of which worked diligently in the backdrop. They put in a lot of effort, showed extraordinary commitment, and dedication towards their roles, and acted extremely professionally and responsibly to achieve the desired targets. Gaining recognition from the world's leading platform is a collaborative effort.

Moving forward, they plan to achieve greater sales numbers and serve double the number of clients they did in the past year. They are currently expanding and have recently opened their new development center in Jaipur, also known as the Pink City of the country, in the subcontinent India.

They are aggressively hiring for multiple positions, expanding their team, and adding new clients. They call themselves a team of ambitious, self-driven individuals who share the mindset and attitude necessary to achieve the unthinkable.

Talking about the app business market last year, the revenue numbers registered by Apple App Store and Google's Play Store show a continuous growth quarter-on-quarter. While the first quarter of 2021 saw \$31.8 billion coming in, the next quarter registered an increase with \$33.1 billion, followed by \$33.6 billion and \$34.5 billion in the third and fourth quarters, respectively. However, it declined slightly to \$32.5 billion in Q1, 2022. Overall, the growth in the mobile app business is expected to rise in the coming months and years.

Mobile app development companies around the world should consider how briskly the market is changing. The rate of transition should match the rate at which the market transformation is happening. Failing to meet would result in losses, economic as well as market positioning. Also, app developers should be flexible to learn new things and adopt technologies quickly as they come to light because the earlier they adopt, the better it is to reap the benefits.

About AppDevelopmentCompanies.co

AppDevelopmentCompanies.co is a trusted platform that features reputed and experienced companies in the field of web and mobile app development. It acts as a bridge between the service seekers and service providers. The platform helps the service seekers to connect with the top app development companies in their vicinity.
